

STATE OF MISSOURI

NINTH AND TENTH ANNUAL REPORTS

OF THE

PUBLIC SERVICE COMMISSION

For Years Ending November 30th, 1921
and September 30th, 1922

COMMISSIONERS:

JOHN A. KURTZ, Chairman
EDWIN J. BEAN
NOAH W. SIMPSON
HUGH McINDOE
A. J. O'REILLY

JEFFERSON CITY, 1922.

MISSOURI PUBLIC SERVICE COMMISSION.

Commissioners:

JOHN A. KURTZ, Kansas City, Chairman,
EDWIN J. BEAN, DeSoto,
NOAH W. SIMPSON, LaBelle,
HUGH McINDOE, Joplin,
A. J. O'REILLY, St. Louis.

JAMES P. PAINTER, Milan, Secretary,
FORREST G. FERRIS, JR., St. Louis, *Reporter of Opinions*,
K. R. MORROW, Warrensburg, Executive Clerk,
MYRTLE K. SHAW, Clarksburg, Record Clerk,
MARY FIDLER, Salisbury, Opinion Clerk,
MARY GREEN, Jefferson City, File Clerk,
RUTH STEVENS, Rolla, Conference Clerk,
JAMES VAN PELT, Joplin, Janitor,
OSCAR MOORE, Jefferson City, Assistant Janitor.

Legal Department:

L. H. BREUER, Rolla, General Counsel,
J. D. LINDSAY, Clinton, Assistant Counsel,
ANTONETTE WOLFF, Stenographer.

Railroad Department:

C. B. BEE, Jefferson City, Chief Rate Expert,
MARTHA HEISINGER, Jefferson City, Rate Clerk.

Engineering Department:

J. L. HARROP, Jefferson City, Chief Engineer,
BENJ. F. SCHABERG, St. Louis, Assistant Engineer,
E. E. TOWLES, Jefferson City, Assistant Engineer,
W. K. FREUDENBERGER, Columbia, Assistant Engineer,
F. M. PLAKE, Kansas City, Assistant Engineer,
LUCIAN A. EATON, JR., Kansas City, Assistant Engineer,
J. E. FLANDERS, Paris, Assistant Engineer,
ANNA McCULLOUGH ROOT, Edina, Statement Clerk.

Accounting Department:

T. J. MURPHY, St. Louis, Chief Accountant,
H. W. ROSS, St. Louis, Assistant Accountant,
GEO. B. COLEMAN, St. Louis, Assistant Accountant,
C. M. COBLE, Kansas City, Assistant Accountant,
H. B. LYSAGHT, St. Joseph, Assistant Accountant,
A. L. HOULEHAN, St. Louis, Assistant Accountant,
W. R. KELLER, Kansas City, Mo., Assistant Accountant,
KATHERYNE E. MANSUR, Jefferson City, Statement Clerk.

Electric Light, Water and Gas Department:

L. W. HELMREICH, Boonville, Chief Electrical and Mechanical Engineer,
N. C. MANN, St. Louis, Assistant Engineer,
RUTH ERWIN, Neosho, Clerk.

Telephone and Telegraph Department:

W. W. JOHNSON, Kansas City, Telephone Expert.
EDITH COX HAMMEN, Kirksville, Mo., Clerk.

Official Commission Reporters:

EDITH WEST, Springfield.
C. W. JOHNSON, Kansas City, Mo.

GENERAL OFFICES: First Floor Capitol Building, Jefferson City, Mo.

LETTER OF TRANSMITTAL.

STATE OF MISSOURI.

Public Service Commission,

Jefferson City, Mo., October 1, 1922.

To His Excellency,

ARTHUR M. HYDE,

Governor of Missouri.

Dear Sir:—

I have the honor to transmit herewith the Ninth and Tenth Annual Reports of the Public Service Commission for twenty-two months, beginning December 1, 1920 and ending September 30, 1922.

Very respectfully yours,

JOHN A. KURTZ,

Chairman.

STATE OF MISSOURI

NINTH AND TENTH ANNUAL REPORTS.

OF THE

PUBLIC SERVICE COMMISSION.

History and Growth of Public Service Commissions:

State regulation of public utilities is of comparatively recent growth. Most of the state commissions have been created within the last fifteen years. The Public Service Commission of Missouri was created in 1913, only nine years ago.

Prior to regulation by state commissions public utilities were regulated in two ways: 1. By the general assemblies of the respective states through the enactment of regulatory statutes. 2. By municipalities through enactment of franchise ordinances and other ordinances regulating service. The regulatory statutes enacted by the general assemblies of the respective states were of two kinds; those establishing hard and fast rules as to standards for service and those fixing maximum charges as to rates. These statutes usually pertained to railroads and provided penalties for failure to furnish cars, rules for the establishment of crossings and other similar matters. Practically all of the states likewise at some time or other enacted statutes fixing maximum fares for passenger and freight service. These statutes were almost invariably the subject of long litigation in the federal courts, resulting in many cases in decisions enjoining state officers from enforcing the statutes, on the ground that they were confiscatory and in violation of the Constitution of the United States.

The legislatures did not undertake to any great extent to regulate local utilities such as water, gas, electric and telephone companies. It was entirely impractical for the legislatures to deal in detail either as to service or rates with these local utilities. Their regulation was left to the municipalities served. In the early period regulation by municipalities was done by the granting of franchises wherein the maximum rates were fixed and determined. These franchise ordinances were invariably the

result of long negotiation between city councils and the utilities. The regulation of service was done by the passage of general ordinances prohibiting specific practices. Shortly prior to the advent of state regulation by commissions the larger cities in many instances had created local utility commissions charged with the duty of regulating the utilities, particularly with reference to service.

Under these two systems of regulation the public service corporations were actively engaged in politics. In many instances the city councils were controlled by the utilities. Lobbyists were maintained at all sessions of the general assemblies. Anyone can recall the many scandals which arose out of such a situation. It is not necessary to mention any specific instances as the scandals of many of the large cities of the United States are familiar to all.

As a result of this entirely unsatisfactory manner of dealing with the utilities, regulation by state commissions came into being. These commissions were equipped with full power and authority and with the necessary machinery in the way of rate experts, engineers, accountants, and telephone, electric and gas experts to enable them to go into the technical side of matters and deal with the subject in an entirely rational manner and in harmony with the constitution and laws of the land requiring fair dealing with both the public and the utility. This form of regulation has resulted in at least one outstanding fact, namely, that it has tended to lessen the activity of these corporations in political matters.

The primary duty imposed by statute upon the public service commissions is that of the protection of the public against exorbitant charges and unfair practices on the part of the utility. This is necessarily so. Except for the fact that the rights of the public were being transgressed by the acts of the utilities no necessity would have existed for a regulatory body. Utilities are in the nature of monopolies. Monopolies tend toward unfair practices and exorbitant charges. To protect the public from such practices and charges regulation is necessary. While the primary duty of a commission is to protect the public, yet the Constitution of the United States and of the several states as well as the statutes creating the commissions cast another duty upon them, and that is to exercise these powers of regulation in such a manner as not to confiscate the property of the utility or to unjustly or unfairly interfere with the use of private prop-

erty. In short, the law contemplates that regulation must be done with due regard for the just and legal rights of all parties, whether it be the consumer or the utility. The statutes require the commission to fix "just and reasonable rates with due regard, among other things, to a reasonable average return upon the value of the property actually used in the public service, and to the necessity of making reservation out of income for surplus and contingencies."

This principle of a "square deal" is accepted as of course by all citizens of a republican form of government. No just man desires that he should have utility service, or for that matter, any other service, for less than what it reasonably costs to furnish the same, taking into consideration a fair and just profit to invested capital. Controversies do not arise upon the principle involved. The doubt which arises is in the application of the principle to the facts. The average person, not being familiar with the facts in reference to state regulation, is sometimes led to doubt the honesty and ability of the personnel of the commissions to get the true facts. This doubt will probably never be entirely eliminated any more than has all doubt as to the integrity of the courts been eliminated. However, the public is gradually becoming familiar with regulation, and the opposition to state commissions will gradually decrease as the cost of operation decreases and the commissions are enabled thereby to reduce rates. If operating costs decrease as they did following the Civil War and following the Napoleonic Wars and all great wars of history, utility rates will likewise decrease by action of state commissions. As the average consumer only realizes the results of regulation he will not be fully convinced of its adequacy until rates have been reduced. In the meantime those in power and charged with the duty of looking after the public business, should carefully acquaint themselves with the facts and not form judgment from apparent results alone.

THE PUBLIC SERVICE COMMISSION OF MISSOURI.

This Commission was created in April, 1913, a very inopportune time for it to begin operation. If it had been created ten years earlier, it would have had an opportunity to demonstrate its operation under normal conditions. As it was, during the first few years of its existence there was no opposition from the public against the Commission. The public appreciated the relief which the Commission gave in matters of service. Partic-

ularly the rural districts found that they at last had a body to which they could complain of unfair practices of railways in matters of furnishing adequate depots, freight houses, stock yards, cars, and many other things pertaining to the service. Likewise the Commission during this early period of its existence made a number of orders lowering rates and very few increasing rates.

However, hardly was the Commission organized, and hardly had it completed the employment of its experts, engineers and accountants, when the chaotic conditions resulting from the World War were thrust upon it. Prices of labor and materials began to rise and continued to rise until 1921. The rising prices resulted in increased costs of operation. The average business man, such as the manufacturer and the merchant, met this increase in prices of raw materials, merchandise and labor by himself making a prompt increase in the selling price of his commodities. He not only increased his selling price sufficient to take care of the increase in the price of labor and materials, but he added some additional so as to net a greater per cent net profit on his investment over that which he enjoyed prior to the war. On the other hand, the utility could not meet this increase in prices and increase in cost of operation by an increase in rates in the same manner. The utilities had to procure an order from the Public Service Commission before they could increase their rates. When they made their application it was not immediately granted by the Commission, for the Commission had to make investigations into the revenues and expenses of the utility; had to make investigation into the value of the property on which the utility was entitled to a return, and it had to hold public hearings before an order could be made. These investigations and hearings required from three to nine months' delay, during which time the utility had to charge the old unremunerative rates.

These applications for increases were opposed by the public officials of the respective communities, and in a great many instances took the form of great public agitation against rate increases, it being contended in many cases that the public was being profiteered against from all sides and that the Public Service Commission should not burden the public with further increased costs of living. The Commission, in passing upon these cases, necessarily had to use the operating expenses for a year prior to the hearing as a basis for estimating the future operating expenses of the company. The Commission could not assume a

continuance of the rising prices and increases in the cost of operation, but had to leave that to the future. Prices, however, continued to rise, and operating costs continued to increase for a period of several years, only ending in the first part of the year 1921. Thus the basis on which the Commission had estimated the operating expenses for the future, within six months or a year after the hearing had become entirely obsolete, and the utility again found itself facing a deficit in the amount which it was entitled to earn, and again made application to the Commission for a further increase in rates.

It is readily to be understood what effect this situation had upon the public mind. A storm of opposition arose against the Public Service Commission. The public was suspicious. In many instances this suspicion, instead of being allayed by public officials who had appeared before the Commission in opposition to the application for increases, and who knew the facts, was intensified by statements of such officials made at the hearings. These statements were not made as uncontradicted facts, but were made in the trial of a case with a view of preventing the Commission from increasing the rates further than was absolutely necessary. However, they were accepted by the public as uncontradicted facts.

The Commissions of all the states of the Union faced this situation with courage and determination. Not a single state commission was able to pass through the period of high prices without increasing utility rates all along the line. They were compelled to do so to save many of the utilities from bankruptcy and receiverships and to save the service for the public. The fact that the public service commissions all over the land met this situation in a courageous manner is the strongest argument in support of the correctness of the principle of state regulation. If the commissions had failed to increase the rates and thereby had stultified themselves under their oaths of office to support the Constitution and the laws of the state, they justly would have been entitled to public condemnation, and state regulation would have been demonstrated as a complete failure.

The situation which faced the Public Service Commission and the conditions which it was compelled to meet in the handling of rate cases is graphically illustrated by a few tables setting forth the increased costs of operation. The Bureau of Labor Statistics has compiled a table of index numbers of wholesale prices, using the prices of the year 1913 as the basic price of one

hundred per cent. Such items as affected the costs of operation of utilities are set forth below:

Year.	Fuel and lighting.	Metal and metal products.	Building material.
1913.....	100	100	100
1916.....	119	148	101
1917.....	175	208	124
1918.....	163	181	151
1919.....	173	161	192
1920.....	238	186	308
1921 (Jan.).....	228	152	239
1922 (Jan.).....	183	117	202

It appears from the above table that in 1920 fuel costs were 238 per cent., metal products 186 per cent. and building materials 308 per cent. of their cost in 1913.

Engineering News, a publication used by the engineering profession, and recognized as an authority on questions of engineering, has compiled statistics of average wages of common labor for the entire United States as follows:

Year.	Common labor, cents per hour.
1913.....	.19 cents
1914.....	.20 cents
1915.....	.21 cents
1916.....	.23 cents
1917.....	.32 cents
1918.....	.45 cents
1919.....	.51 cents
1920.....	.56 cents
1921 (six months).....	.57 cents
1922 (September).....	.43½ cents

From the above table it appears that in 1920 common labor was being paid 56 cents an hour as against 19 cents an hour in 1913, approximately a 200 per cent. increase.

The increase in the price of coal is graphically shown by the prices which the Union Electric Light and Power Company of St. Louis paid for coal, beginning with the year 1914 and ending with the year 1921, as shown by the records of the Commission, which are as follows:

Year.	Price per ton F. O. B. St. Louis.
1914.....	\$1.14
1915.....	1.198
1916.....	1.678
1917.....	2.456
1918.....	3.03
1919.....	3.44
1920.....	4.18
1921.....	4.165

It appears from the above table that that company's prices for coal have steadily increased up to the year 1921, when they were paying almost four times as much per ton for coal as they were in 1914. When it is considered that fuel is one of the principal items of operating expense in an electric utility it can readily be seen and understood why the Commission was compelled to increase electric rates.

How these increased prices as set forth in the foregoing tables affected the utilities of this state is graphically shown by the records of this Commission as taken from the annual reports of the St. Joseph Street Railways Company covering the years from 1914 to 1921, inclusive. The years 1914, 1915 and 1916 are consolidated and an average taken, and likewise the years 1919, 1920 and 1921 are consolidated and an average taken. The following table sets forth the annual passengers carried, the total wages paid conductors and motormen, the total maintenance cost, the total operating revenues, the total operating expenses and the net revenues.

Period of time.	Passengers carried per year.	Total wages, conductors and motormen per year.	Total maintenance cost per year.
3 years, 1914-16.....	20,307,941	\$177,061.56	\$104,261.62
3 years, 1919-21.....	21,021,660	384,092.01	216,476.94
	Total operating revenue per year.	Total operating expense per year.	Net revenue per year.
3 years, 1914-16.....	\$763,952.79	\$450,458.98	\$313,493.81
3 years, 1919-21.....	1,127,149.91	993,546.97	133,602.91

It appears from the foregoing table that this company carried about the same number of passengers per year during the high price period as prior thereto. The wages that it paid to its motormen and conductors, however, increased more than one hundred per cent. The total operating income, however, only increased per year about 47 per cent., which represents the increases in rates allowed by this Commission, while the total operating expenses increased about 120 per cent. The net income per year, instead of increasing, decreased about 59 per cent., showing conclusively that the increases allowed by the Commission in the rates of the St. Joseph Street Railway Company were not sufficient to take care of the increased cost of operation.

The rise in prices is graphically illustrated by another method, namely, that of the purchasing value of the dollar. The National Industrial Board has compiled statistics on this question, starting with the purchasing power of the dollar in 1914. From those statistics it appears that the purchasing value of the dollar was as follows:

July, 1914.....	100.0 cents
July, 1915.....	99.5 cents
July, 1916.....	92.0 cents
July, 1917.....	76.2 cents
July, 1919.....	58.1 cents
July, 1920.....	48.9 cents
July, 1921.....	61.3 cents
April, 1922.....	64.6 cents

The decreases in the purchasing power of the dollar were used by the business man during the high price period as a justification for the increased per cent. profit which he made on his merchandise, and the argument presented was that, if he made 25 per cent profit on his merchandise prior to the war when money was worth 100 cents on the dollar, he was entitled to a 50 per cent. profit when the purchasing power of the dollar decreased to that of 48 cents on the dollar. The Commission, however, in figuring what was a reasonable return on the investment of the utility, allowed but very little, if any, increase in the rate of return and, in those cases in which the Commission did allow an increased rate of return, it was based on the increased cost of money or rate of interest in the open market rather than upon any depreciated purchasing power of the dollar; the Commission rarely allowed more than 8 per cent for return.

The foregoing tables show that construction and operating costs increased from 120 to 400 per cent. The query naturally arises did the Commission increase rates accordingly. The following tables comparing rates existing prior to the war with those in effect in 1921, established by the Commission on the basis of the peak costs of 1920 and 1921, answer the question accurately. Here are the facts:

While municipally owned plants do not pay taxes and are not required to pay dividends to interest capital, yet it seems that municipal authorities found it necessary to increase rates to pay the increased operating expenses in the same manner that private owners did. The opposition to the Commission has largely come from and been organized by city officials, but the facts show that when the duty of determining rates devolved upon city officials they were compelled as the Commission was to raise rates.

Note: (SWB) indicates Southwestern Bell Telephone Company.

Southwestern Bell Telephone rates authorized by the Commission are lower, in most cases, than those now being charged and as hereon indicated. The rates for the Southwestern Bell as hereon indicated are being charged by reason of an appeal now pending in the courts from a decision of the Commission, the excess, by the appeal order of the court is required to be deposited in a trust company until the decision of the United States Supreme Court is handed down, which decision will determine whether the excess shall be refunded to subscribers or not.

The largest item of expense of a telephone system is wages, particularly operators' wages. The per cent increase in the

wages of switchboard operators in the towns and cities listed below was as follows:

The foregoing tables setting forth increased costs of operation with increases in rates show that while operating costs increased considerably more than 100 per cent, rates on an average were increased less than 50 per cent.

So much agitation has been broadcasted in opposition to the Commission that some of the public have been led to believe that the Commission while created for the purpose of protecting the public from extortionate rates, has done nothing since its creation except increase rates. Of course, those who are at all familiar with the work of the Commission, or with its published reports, know that such a view is wholly unjustified. Here are the unvarnished facts concerning the matter. Below a table is set forth of all formal rate cases decided by the Commission, which cases are reported in the published reports. This table shows the number of cases in which increases were authorized, in which decreases were ordered, and in which applications for increases were denied.

Year.	No. of increases granted.	No. of decreases ordered.	No. of increases denied.	Total cases.
1913.....	0	2	5	7
1914.....	1	6	10	17
1915.....	4	5	4	13
1916.....	14	10	21	45
1917.....	19	5	7	31
1918.....	68	0	6	74
1919.....	68	4	8	80
1920.....	89	4	3	96
1921.....	87	6	5	98
1922 (6 months).....	10	7	5	22
Totals.....	360	49	74	483

It appears from the foregoing table that during the abnormal price conditions of the war period the Commission decided 360 or 75 per cent of the rate cases in favor of the utilities, and 123 or 25 per cent of the cases in favor of the public. However, it is to be noted further that if the more normal period of the first four years be taken that the ratio is 19 or about 23 per cent of the cases decided in favor of the utilities and 63 or about 77 per cent of the cases decided in favor of the public. Again, during the first six months of the year 1922 when there had been a slight decline in prices, the Commission decided 10 or 47 per cent of the cases in favor of the utilities, and 12 or 55 per cent of the cases in favor of the public, and, in addition thereto, during this same six months, reduced rates in about forty towns or cities in the state without formal hearings, which, when added to the 12 formal cases, changes the ratio very much in favor of the public. The only period since the creation of the Commission, which has been anything like normal was the first four years thereof, 1913 to 1916, inclusive, but even these first four years were not normal years, as the World War had been in progress two and one-half years of the time, and operating costs had already increased, as appears from the tables hereinbefore set forth, as follows: Fuel 19 per cent, metal and metal products 48 per cent, common labor 25 per cent, steam coal at St. Louis 47 per cent, while the general purchasing power of the dollar had decreased 8 per cent.

The table shows further that the number of rate increases ordered increased only as operating costs increased. A striking fact, however, appears in the immediate response of the Commission to the decline in prices which took place in the latter part of 1921 and the first few months of 1922. Where there were 87 increases in the year 1921, during the first six months of 1922 there were only 10 increases, with 7 decreases and 5 applications for increases denied. There are now pending before the Commission only a very few rate increase applications.

In respect to the figures of the first six months of 1922, the response of the Commission to declining prices is not fully reflected. The cases set forth in the table are formal cases only in which the Commission held hearings. In addition to the formal cases the Commission during the first six months of 1922 reduced rates in a great number of towns in the state, without formal hearings. When the prices of oil and fuel declined during the latter part of 1921 and the first part of 1922, thus result-

ing in a decreased operating cost for utilities, such as gas plants and electric companies, the Commission did not wait for formal hearings to reduce the rates as it had done in all cases where increases of rates were granted. The Commission was more prompt in matters of decreases. In other words, it made orders decreasing rates without holding formal hearings in the matter. The Commission was enabled to do this by reason of the fact that the utilities were required by the orders granting increases to file with this Commission verified, detailed, financial statements of their revenues and expenses. These reports in some instances were required to be filed monthly, in some quarterly, in some semi-annually, and in others annually, as the circumstances in the case seemed to require. These were special reports required to be filed in addition to the regular annual reports required of all companies. As these reports came to the Commission they were analyzed by the Commission's engineers and accountants and compared with other data in the files of the Commission. Wherever it appeared that a utility had a sufficient decrease in operating cost so that a cut should be made in its rates, the Commission did not set the same for formal hearing, but simply called the utility on the telephone and advised it that it could stand a reduction of a certain amount in its rates, and was asked if it would acquiesce in the suggested reduction or would demand a formal hearing. The utilities in most cases acquiesced in the reduction, some of them protesting, but, nevertheless, acquiescing. Thereupon the Commission made an order reducing the rates.

The Commission, of course, could have attracted public attention to this work of reducing rates by simply setting all these cases down for formal hearing. This, however, would have resulted in a delay of from three to six months. Instead the Commission without flourish of trumpets procured the reduction immediately for the benefit of the consumers. Unfortunately, this work received a very serious check by the coal and railway strikes resulting in higher costs of fuel. When the decreases made without formal hearing are added to the decreases after formal hearing, we have a total of 40 decreases as against 10 increases during the first six months of 1922.

It should be added here that all increases in rates made by the Commission were made only after formal hearing, except in such cases where the consumers made no objections and the public officials recommended to the Commission that the in-

creases be allowed, which, by the way, has happened in quite a number of cases, the local officials having examined the cost of operation as compared with the revenues and frankly admitted that the utility was entitled to an increase in rates so as to render the public the service to which it was entitled.

Below is a list of towns and cities in the state where such reductions by "acquiescence" without formal hearing were made by the Commission during a period beginning December, 1921, and ending September 1, 1922.

It would seem that the foregoing facts would conclusively show that the Commission has done something besides increase rates. This further salient fact, however, is to be added; that while the Commission has had jurisdiction during the nine years of its existence over approximately 1500 utilities each year, yet only a total of 360 rate increases have been authorized by the Commission during its entire history. At the same time it has had a total docket of about 3500 formal cases. In other words, while the Commission has authorized 360 rate increases during the abnormal war price period it has in the same time disposed of approximately 3100 other formal cases dealing with the supervision of capitalization, regulating service, and including therein 47 rate decreases and 74 applications for increases denied.

In addition to the formal cases of approximately 3500 disposed of, the Commission has handled a great number of informal complaints regarding service that have been disposed of by correspondence or over the telephone. More will be said in reference to these informal complaints in a later paragraph.

Procedure in Rate Cases.

One of the things in which the public is entirely misinformed pertains to the procedure which the Commission follows in the establishment and fixing of rates. There are two fundamental considerations involved in a rate case: 1. What is the fair value of the property used and useful in rendering service to the public? 2. What are the operating revenues and reasonable operating expenses of the utility in rendering this service?

When the Commission has found and fixed the fair value of the property and has determined the reasonable operating expenses of the company in furnishing the service, there remains only the building of a schedule of rates which will bring revenues to the company sufficient to pay these reasonable operating expenses and, in addition thereto, a sum which shall be considered an adequate return on the value of the property.

To take a concrete example, the Commission had before it in 1920 the application of the Lafayette Telephone Company operating at Lexington, Missouri. The Commission's engineers made an appraisal of the property of this plant, which appraisal showed that the original cost of the investment, that is, the physical property used and useful, was \$90,331. This did not include anything for going value. The utility presented an appraisal on a reproduction new basis showing that the plant was worth \$103,729. The Commission, after hearing evidence in the case and taking into consideration the accrued depreciation, fixed a value on the plant of \$85,000 as of January 1, 1921. The accountants of the Commission made an audit of the books of the company covering the revenues and expenses for a period of one year. From that audit, together with other evidence which was introduced in the case, it appeared that there had been an increase in operating expenses in 1920 over that of 1919 of \$3,100; and an increase in 1920 over that of 1917 of \$6,336. It appeared likewise that the total revenues during the year 1920 were \$29,112, and that the total operating expenses, including reserve for depreciation, were \$27,605, thus leaving a net revenue of \$1,507, or 1.77 per cent for return on the investment, which, of course, was entirely inadequate. So the problem involved was that of building up a schedule of rates to sufficiently increase the revenues to provide a reasonable return. The Commission thereupon proceeded to fix a schedule of rates which increased the estimated net revenues to \$5,633, which would produce a return of 6.62 per cent per annum on the value found of \$85,000.

The above example illustrates the questions which the Commission must determine. Those questions, primarily, are in getting the facts as to the value of the property, and the facts in reference to the reasonable operating revenues and expenses.

It is, therefore, very essential that the Commission have competent engineers, familiar with utility properties, to inventory and appraise the value thereof, and also that the Commission have competent accountants to make audits of the books and records of the company for the purpose of determining the revenues received and the legitimate and reasonable expenses paid out in operations. To do this work the Commission has two departments, a valuation department and an accounting department.

Valuation Department:

In the valuation department the Commission now has a chief engineer and six assistant engineers. The chief engineer has been with the Commission since its original organization. Prior to coming to this Commission he was an assistant engineer with the Wisconsin Commission. He has charge, not only of the valuation work, but also is chief adviser of the Commission in matters pertaining to construction work of all kinds, whether it be a new depot, an interlocker system, viaducts, filtration plant in waterworks, or retorts in gas plants. The demands made on the chief engineer of the Commission are very voluminous and very exacting, and a very heavy responsibility is placed upon him. It is, therefore, essential that he be an experienced, capable and energetic man with his integrity and trustworthiness beyond question. Such a man the Commission has in its chief engineer.

The six assistants who are in the valuation department are divided ordinarily into two crews to do the field work for the chief engineer. The principal work is that of valuation, but in addition to valuation work they make inspections and investigations of any structural work as enumerated above that may be pending before the Commission. These two crews of engineers are continually in the field making inventories and determining values. This force is not as large as it ought to be to meet the demands that are made upon the Commission by the respective communities for valuations of utility properties. The Commission has under its jurisdiction about 1,400 gas, electric, water and telephone utilities, to say nothing of street railways and steam railways. However, the Commission is enabled with the force

which it now has to make valuations in the most urgent cases, and through their experience make estimates of values in cases where detailed appraisals cannot be made. In such cases the Commission makes estimated tentative values. Experience has shown that the tentative values are seldom too high. In gathering information as to the value of a property these engineers go over the entire plant in minute detail, inspecting and inventorying the same. They separate the units not in use from those that are used and useful which are inventoried separately. It is only the useful parts of the plant that are included in the valuation for a rate base. The engineers in making up the inventory endeavor to learn and determine the date, as near as possible, when the respective units were installed. After they have completed their inventory they then go into the records and files of the company and examine its vouchers and books to find out just what the utility paid for the respective units as of the date when the same were installed. For instance, if a particular plant was erected in 1910, the engineers determine from the actual receipted vouchers of the company what the engines and dynamos and other equipment actually cost the company. They also determine in the same manner what was paid for labor in making installation of the units so that they will have a proper base to determine the cost of the plant installed. In the event the records of the company have been lost or destroyed, which is quite often the case for parts of plants which have been in operation for a great number of years, such as the United Railways of St. Louis or the Gas Company of St. Joseph, the engineers, from data contained in the Commission's offices and compiled by the engineers as to prices of materials and of labor as of the date in question, estimate the original cost of that part of the plant for which actual records are not available. When they have assembled the entire matter a written detailed report is then submitted to the Commission for its information, which report is introduced in evidence at the time of the hearing of the case, and the engineers at that time likewise present oral testimony in detail, enlarging upon the written report. In making a valuation the engineers include only the actual physical property of the plant installed and in operation. They allow nothing for franchises, going concern or any other intangible item.

A better idea of the work of the Commission's engineers and of valuations fixed by the Commission can probably be gathered from a list of the permanent valuations heretofore fixed. Such a

list giving the names of the utility, the totals of values claimed by the companies, the total values found by the Commission's engineers and the valuation finally determined and fixed by the Commission, is as follows:

Appraisals of Utilities Completed by the Commission.

Supplementing the work of the engineering department in making valuations, the accounting department likewise makes an audit of the plant account of the utility's books for the purpose of determining by another method what the company has invested in its plant. A list of some of the audits made by the Commission's accountants showing the plant account as it appears on the books of the company, and the account, as the auditors have found it should be by eliminating therefrom items which, under Commission regulation, are not properly charged therein, is as follows:

Audit made	Name of Company.	Property Account.	
		Company's books.	Accountant's audit.
1914	Mo. Public Utilities Co., Charleston Electric Plant.	\$246,486.97	\$84,751.77
1914	Southwestern Bell Tel. Co., St. Louis Exchange.....	8,209,706.93	7,398,478.60
1914	Jefferson City L., H. & P. Co., Gas & Electric.....	498,317.80	345,013.45
1914	West St. Louis Water & Light Co., St. Louis County.....	2,581,739.60	1,223,225.29

1922	Joplin Gas Company.....	964,818.09	854,822.11

To date the Commission's Accounting Staff has audited about 120 utilities. The above 24 are fairly representative.

It is found that the principal items charged on the books in plant account that represent no value, or value upon which the consumer should not be compelled to pay a return, are as follows:

Capitalization of Franchises: The accountants have found immense sums charged to property account for franchises, which undoubtedly did not represent any expenditures by the company.

Bond Discount and Expense: This is another item often charged to capital account.

Excess Par Value of Stock Over Actual Cost of Property Acquired: This represents probably the largest unit of property account inflation with which the Commission has to deal. Reorganization and property transfer, in the earlier days of utility operation, practically all show an exaggerated book cost, created from this source.

Capitalization of Promotion Cost: In some cases the accountants find that a new company would probably bond its property for 75 per cent of its true value; then issue preferred stock for the balance of the actual value; and in addition, issue 30 per cent or 40 per cent of the true value of the property in common stock. Such common stock was given to the promoters and presumably was based upon the anticipated future earning power of the company, such earning power not being subject to regulation in the early history of utility operations.

Obsolete and Discarded Property: This the accountants find to be a common fault. Their present book cost still contains the cost of property long since discarded and, of course, in many instances, the cost of the new property, replacing the old, is also in the plant account.

Operating Expenses and Stockholders' Losses: The accountants have found many items of operating expenses capitalized; also expenditures which should be borne by the stockholders of the corporation. Of the latter, there are such items as Reorganization Costs, or Segregation Costs, where a holding company was operating two or more classes of utilities and of its own volition decided upon a separation and reorganization. Such expenditures as these should not be assessed against the consumer.

However, it is only fair to state that these improper items often found in capital account on the books of the utilities were charged therein in most instances long prior to the creation of this Commission. Since this Commission has had charge the utilities generally have not charged such items into capital account. The general practice now is to take the valuation which the Commission fixes as a starting point and charge to capital account thereafter only such additions and extensions as are made to plant. Everyone knows that the early practice was for all corporations, whether they were utilities or the ordinary business corporation, to capitalize many things other than actual physical assets. The items above set forth were matters of capitalization by a great per cent of business corporations, and the utilities, not being under regulation any more than any other corporation, followed the same practices. Since state regulation of utilities has come utility corporations are prevented from capitalizing anything except that which represents an actual value, while the business corporation is not supervised in its capitalization to the same extent.

Recurring to the facts set out in the valuations made by the Commission, it is to be noted that the valuations fixed by the Commission in individual cases do not necessarily follow that submitted by the Commission's engineers. In some instances the final figure fixed by the Commission is greater, and in other instances it is less than that submitted by the engineers. The reason for this is that the engineers have submitted value only on the basis of the original cost of the physical property. They have made no estimate as to going concern value, which represents an actual investment, or many other elements of value which may appear at the time the testimony was taken at the hearing. Original cost is considered by the Commission the main element of value. It is, however, not absolutely controlling. The courts have laid down the principles governing the Com-

mission in fixing values. In one of the leading cases the opinion was written by Justice Hughes, then a member of the Supreme Court of the United States. Some idea of the law governing the Commission in these matters can be gathered from reading this opinion. Therefore, a quotation from said opinion would not be out of place.

Minnesota Rate Case, 230 U. S. 434.

"1. The basis of calculation is the 'fair value of the property' used for the convenience of the public. *Smythe v. Ames*, supra (p. 546). Or, as it was put in *San Diego Land & Town Co. v. National City*, supra (p. 757), 'What the company is entitled to demand, in order that it may have just compensation, is a fair return upon the reasonable value of the property at the time it is being used for the public.' See also *San Diego Land & Town Co. v. Jasper*, supra; *Wilcox v. Consolidated Gas Co.*, supra.

"2. The ascertainment of that value is not controlled by artificial rules. It is not a matter of formulas, but there must be a reasonable judgment having its basis in a proper consideration of all relevant facts. The scope of the inquiry was thus broadly described in *Smyth v. Ames*, supra (pp. 546-547): 'In order to ascertain that value, the original cost of construction, the amount expended in permanent improvements, the amount and market value of its bonds and stock, the present as compared with the original cost of construction, the probable earning capacity of the property under particular rates prescribed by statute, and the sum required to meet operating expenses, are all matters for consideration, and are to be given such weight as may be just and right in each case. We do not say that there may not be other matters to be regarded in estimating the value of the property. What the company is entitled to ask is a fair return upon the value of that which it employs for the public convenience. On the other hand, what the public is entitled to demand is that no more be exacted from it for the use of a public highway that the services rendered by it are reasonably worth.'"

Excessive Bond Issues and Watered Stock:

It is often stated by those unfamiliar with Commission work that rates are fixed so as to pay dividends on watered stock and interest on excessive bond issues. Those who make this assertion are wholly ignorant of the facts. Such loose statements are usually made by uninformed and over-zealous advocates. The fact is that the Commission does not pay any attention to the amount of bonds or stock outstanding in arriving at a rate base value or in determining the rate. This is apparent from the audits made by the Commission's accountants. The reductions made in the plant account by the accountants are largely due to the throwing out of franchises and over-issues of stocks and bonds. The valuations on which rates are based by the Commission are made up of actual property and actual investment. All watered stocks or excessive bond issues are eliminated. Nor does the Commission fix rates to provide money to pay interest

on excessive bond issues or dividends on water stock. It fixes rates that will provide a reasonable return on the actual investment. If this is sufficient to pay interest and dividends on outstanding bonds and stocks, well and good; if not sufficient, the holders of such bonds and stocks have to do without interest and dividends. The public is under no obligation to pay interest charges and dividends on bonds and stocks that do not represent actual property used and useful in rendering service to the public, and this is the theory on which the Commission bases its valuations and fixes rates.

While these are the facts in regard to watered stocks and excessive bond issues, nevertheless there is no single item in reference to regulation which has been used by those who oppose the Public Service Commission more than this question of watered stock and excessive bond issues. In nearly every speech and every pamphlet that has been given to the public in opposition to the Public Service Commission the statement will appear in one form or another that the Commission does nothing but raise rates so as to pay dividends on watered stock and interest on excessive bond issues. The facts are absolutely to the contrary, which can be proved by anyone by merely taking any particular case and referring to the published reports of the Commission in which the valuations and rates are fixed.

Operating Revenues and Expenses:

In arriving at what the revenues and expenses of a utility are the Commission requires a statement of the revenues from all sources, separated into classes. If it be a telephone company, a list is required of all telephones divided into classes, so that when the number of telephones are multiplied by the rate the total revenue is found. The same method is used in regard to electric companies by requiring the kilowatt hours in each class, and in respect to gas companies by requiring the thousand cubic feet in each class. Usually little difficulty is found in arriving at the total revenues. In regard to expenses the Commission requires statements of expenses separated into minute detail so that the Commission's accountants can make an analysis and comparison of each department of expenses with other companies where audits have been made by the Commission. During the war period it was impossible for the Commission in every case to audit the books of the utility. The commission did not have the funds with which to employ the necessary accountants to do

this, and, in fact, it was not necessary that an audit be made in each case, as the Commission had sufficient audits of other like companies with which to make comparisons to determine whether there was anything radically wrong with the statement of expenses submitted to the Commission by the company under investigation. Where, by such comparisons, doubts arose concerning the accuracy of the expense items submitted, the case was continued and an audit directed. Another reason why an audit was not necessary in all cases is that these rate increases during the war were made for temporary periods of one year, so that a continuous check was had on them by the Commission. In practically all cases involving large companies where there was more likelihood of errors and loading, audits were made before hearings were held.

The Commission, in dealing with the expenses of the utilities, scrutinizes the same with great care. Many items which are ordinarily legitimately charged as expenses in the conduct of an ordinary business concern are not allowed to be charged as an operating expense by a utility. Some idea of the care with which the Commission and its accountants scrutinize the operating expenses of public utilities can be gathered from a concrete example where the Commission's accountants have made an audit. Below appears a list of items eliminated from operating expenses charged on the books of a certain company appearing before the Commission for an increase in rates, to-wit:

AUDIT FOR YEAR 1920.

War Donations—Should be charged to non-operating expenses as this is a stockholders' expense.	\$500.00
Funded Debt Expense—Should be charged to nonoperating expenses as this is the same as interest charges to be taken out of the return.	978.20
Discount on Liberty Bonds—Should be charged to non-operating expenses. Has nothing to do with operating expense.	300.00
Bad Debts Written off—Should be charged to surplus. Applicable to former years.	1,521.27
Bond Election Expense—Should be charged to non-operating expense as this is a stockholders' expense.	6,000.00
Excess amount reserved for injuries and damages.	15,000.00
Non-operating and excess taxes charged.	10,707.38
Cost of repairing and reconstructing track and overhead systems. Should have been charged to depreciation reserve.	81,598.94
Back wages unpaid. Applicable to former years.	6,997.74
Cost of Reconstructing Equipment—Should have been charged to depreciation reserve.	6,103.82
Total.	\$129,707.35*

*The amount taken out of operating expense increased to that extent the net revenues available for return.

It will be noted from the foregoing that many matters which are ordinarily charged into operating expenses by mercantile and manufacturing concerns are not allowed as an operating expense in fixing rates for utilities. The utility is required to pay these items out of the return which is allowed for the stockholders, and these items are not charged up to the consumers. Every serious doubt is resolved in favor of the public and against the utility, the burden of proof being on the utility to establish the reasonableness of its rates.

Accounting Department:

Getting back to the accounting department of the Commission, its organization at present consists of a chief accountant, who has been with the Commission since shortly after its creation, and who is a man of wide accounting experience and able to meet the best utility accountants in a contested case, and six assistant accountants under his supervision, who are divided into two crews. These crews are continuously in the field making audits of the books and records of the utilities to determine whether or not they are charging reasonable rates. Some idea of the amount of work done by this department can be gathered from the list below giving the names of the companies whose books have been audited since April 30, 1921, a period of eighteen months.

AUDITS MADE BY THE ACCOUNTING DEPARTMENT OF THE PUBLIC SERVICE COMMISSION SINCE APRIL 30, 1921.

California Light Plant, California, Missouri.
 Sedalia Home Telephone Co., Sedalia, Missouri.
 Suburban Telephone Co., St. Louis County, Missouri.
 Kinloch Long-Distance Telephone Co.,
 (St. Charles and Valley Park Exchanges).
 Kinloch Telephone Company, St. Louis Exchange.
 Harvey Light, Power and Ice Company, Eldon, Missouri.
 Southwestern Bell Telephone Co., (Marshall, Missouri Exchange).
 Hanamo Telephone Co., Maryville, Missouri.
 Kirksville Gas, Heat and Electric Co., Kirksville, Missouri.
 Kansas City Telephone Company, Kansas City, Missouri.
 Tarkio Electric and Water Co., Tarkio, Missouri.
 Kansas City Long-Distance Telephone Co.,
 (Excelsior Springs and Richmond Exchanges.)
 Columbia Telephone Co., Columbia, Missouri.
 Trenton Gas and Electric Co., Trenton, Missouri.
 Southwestern Bell Telephone Co., (Kirksville Exchange).
 Home Telephone Co., Centralia, Missouri.
 Carthage Gas Co., Carthage, Missouri.
 Webb City and Carterville Gas Co., Webb City and Carterville, Missouri.

St. Charles Light Co., St. Charles, Missouri.
 Warrensburg Electric Light, Heat and Power Co., Warrensburg, Missouri.
 Knobnoster Electric Co., Knobnoster, Missouri.
 Concordia Light and Power Co., Concordia, Missouri.
 Kansas City Gas Co., Kansas City, Missouri.
 West St. Louis Water and Light Co., St. Louis County, Missouri.
 Missouri Public Utilities Co.,
 (Webb City and Carterville Water Plants).
 Rockport Light and Power Co., Rockport, Missouri.
 Laclède Gas Light Co., (Electric Department) St. Louis, Missouri.
 City Light and Traction Co., Sedalia, Missouri.
 Brookfield Electric Light Co., Brookfield, Missouri.
 Laclède Electric Light Co., Laclède, Missouri.
 Rothville Electric Light Co., Rothville, Missouri.
 Browning and Purdin Electric Co., Browning and Purdin, Missouri.
 Sumner Electric Co., Sumner, Missouri.
 Linneus Municipal Light Plant, Linneus, Missouri.
 Water, Light and Transit Co., Brunswick, Missouri.
 St. Joseph Water Co., St. Joseph, Missouri.
 Laclède Gas Light Co. of St. Louis, Missouri.
 Springfield Gas Co., Springfield, Missouri.
 St. Charles Lighting Co., (Gas) St. Charles, Missouri.
 LaMonte Light and Power Co., LaMonte, Missouri.

A greater service to the public could be rendered by the Commission if it could have twice this number of accountants. Particularly is this true during these times of readjustment. The Commission has to forego the auditing of books in many cases where the Commission really feels that the audit would be useful in determining the questions before it. As it is, the Commission must necessarily exercise its discretion in determining in what cases audits shall be made. In doing so it often is required to deny requests from public officials for an audit of the books of the utilities located in their particular communities. But, as stated before, the Commission has been able with the accounting staff which it has to fully protect the rights of the public in reference to rate increases. The only necessity for additional accountants would be to make the work of the Commission still more efficient.

It is sometimes said by persons suspicious of the Commission's work that they do not doubt the honesty of the personnel of the Commission, but think that the utilities "put up jobs" on the Commission and its experts. In other words, that the books of the utilities are doctored or that two sets of books are kept, one for the Commission, and another for the officers and stockholders. If such charges and surmises were true it would seem that occasionally at least some of the many clerks and bookkeepers of these companies would talk out of school and this

fact come to the knowledge of the Commission. In addition, it would seem that some of the accounting departments of some of the commissions of the several states of the Union would at least occasionally discover such frauds. Furthermore, in a case like the Kansas City Telephone case where there were three separate audits made of the company's books and records—one by the Commission of Missouri, one by the accountants employed by the Kansas Commission, and one by accountants employed in Kansas City—that such loading or duplication in books would be exposed. As it was, the Commission's accountants did throw out of operating expenses a number of large items charged therein by the company, but the accountants found no effort on the part of the company to conceal any of the facts in reference to its operating expenses in its record. The items thrown out by the accountants and charged in by the company were matters in which a difference of opinion arose as to the legitimacy of such items under the law. Kansas City appropriated some \$12,000 for the purpose of making an audit and investigation as to the value of the property of said company and its operating expenses. The City's accountants filed no separate report after they had completed their audit, stating that they had found the same results as the Commission's accountants had found, and that, therefore, it was useless to encumber the record with an additional report.

The Commission's accountants in making an audit not only examine the books and ledgers of the utility, but verify every item thereof by requiring the production of paid vouchers showing to whom the money was paid together with the detailed items for which the same was paid. If the company cannot produce such paid vouchers for any items charged on the books as operating expense, the same is eliminated therefrom by the accountants. It would be impracticable as well as too hazardous for a company to undertake the deliberate padding of its records for the purpose of deceiving the Commission, or to keep a duplicate set thereof. Our records show that one large company under the jurisdiction of the Commission has 417 employes working upon its books and records in keeping its accounts. For the company to keep a duplicate set of these books and records would necessarily increase the number of these employes so that the expense thereof would be prohibitive as well as making the hazard of exposure by some such employes entirely too great. There is no question but that the Commis-

sion by its investigation through its engineers, accountants and rate experts gets the true facts before it. Anyone who will make a detailed investigation thereof will be convinced in the matter.

Stock and Bond Issues :

While little public attention has been paid to the work of the Commission in supervising stock and bond issues, yet this work alone more than justifies the existence of the Commission. No more important work is done by it. There are many utilities organized and capitalized prior to the creation of the Commission that are loaded down with excessive fixed interest and preferred dividend charges. While, as stated before, the Commission does not take these excessive fixed charges into consideration in establishing maximum rates, and does not in any way charge the same to the consumer, yet such excessive charges necessarily hamper the utility in rendering service and prevent it from making improvements and extensions to plant. In some instances such fixed charges have been so excessive that the return allowed by the Commission has been insufficient to pay the same, and the utility forced into a receivership by the bondholders on account of unpaid interest charges. Insofar as the public is concerned, such excessive charges not only interfere with the rendering of good service, but those of the public who have invested in the common stock of such utilities find that they have parted with their money without full consideration. These excessive capitalizations took place prior to the creation of the Commission, and it has no control over such issues already outstanding at the time of its creation, nor can the Commission refuse in most cases to grant further issues where the same are necessary to procure additional capital to make extensions to plant demanded by the public.

Since the creation of the Commission these excessive issues cannot be indulged in, for the very simple reason that the utility first must procure the consent of the Commission before it can legally issue stocks and bonds. The Commission in dealing with these matters requires the utility to submit the details as to the assets back of the proposed issues. They are required to have fixed assets for every dollar of each capital issue authorized. If the proposed issue is paid up, the assets must be in hand, and the engineers of the Commission pass upon the value and advise the Commission, which authorizes an issue not to exceed the value found, and then only for specific purposes which assures

that the proceeds will be used for making additions to capital assets. If the issue is to be sold, the terms of sale are fixed by the Commission at reasonable costs, and the same must be sold only for cash. No bonuses are allowed nor excessive discounts countenanced. Likewise the utility must make semi-annual reports of all sales, showing the amount of the issue disposed of and the proceeds received therefor and the disposition of same. Accurate book accounts are required to be kept subject to the audits of the Commission's accountants. In this manner the Commission supervises and controls the issuance of stocks and bonds of utility corporations. This control and supervision not only tends to protect the investing public, but at the same time protects the public against excessive fixed interest and dividends charges so that the utility may not in the future be hampered in rendering service and procuring additional capital to make needed additions and extensions as the growth of the communities may require. While the Commission does not guarantee or vouch for by its orders stocks and bonds offered by utilities to the public as sound investments, yet this supervision does protect the investing public from having issues unloaded upon it of stocks and bonds based alone on "blue sky" as is the case in so many "get-rich-quick" schemes of certain classes of private corporations.

During the high priced money market of 1919, 1920 and 1921 the utilities, on account of the diminishing returns arising from the increased cost of operation, were unable to finance needed extensions and additions to plant, and during those years applications to the Commission for stock and bond issues were at a low ebb. Immediately after the decline in prices in the fall of 1921 and the spring of 1922, and the decline of interest rates in 1922, the utilities began to flood the Commission with applications for additional capital issues. This is graphically illustrated by the amount of stock and bond issues authorized by this Commission. In the year of 1921 the Commission authorized stocks and bonds to the extent of \$25,602,512. During the ten months ending November 1, 1922, the Commission authorized a total capitalization of \$304,874,203.88, and, in addition thereto, 1,350,050 shares of no par stock. While a great part of the bond and stock issues represented by the figures for 1922 is not new capital invested, but reorganizations of large companies, yet this does not detract from the figures as showing great activity in making extensions and additions to plant. New companies are being organized and old companies are being reorganized so as

to be able to acquire additional capital for the purpose of making these delayed extensions. All of this capitalization, whether it be by additional issues or reorganization issues, is supervised and controlled by the work of this Commission as hereinabove set forth.

Regulating Service:

Another very important work of the Commission that has been overlooked by the public to a very large extent is the regulation of service. Prior to the creation of the Commission small communities had no means except by persuasion to compel a utility to correct defects in service. The larger cities did attempt to regulate these matters by local commissions or boards, but the smaller cities were helpless in these matters. The Commission has relieved that situation. A very large per cent of the 3500 formal cases composing the Commission's docket have been service cases, varying from the compelling of installation of telephones to the building of filtration plants in water works as was ordered and required by the Commission at Clinton and Sedalia, the building of depots as was recently ordered at Macon, the building of viaducts by the railways as was recently ordered at Kirksville, the installation of new pumps and building of water tanks as was recently ordered by the Commission at Tarkio, or the compelling of the sale of a utility to enable someone who is financially able to render service to come in to the field as was recently ordered by the Commission at Greenfield.

It would be entirely too voluminous for the Commission to set out in detail all of the orders which it has made in formal cases in reference to compelling utilities to spend money for the purpose of serving the convenience of their customers. A sufficient idea of the formal cases coming before the Commission can be had by scanning the cases which are now pending before the Commission, a list of which is set forth below, to wit:

City.	Kind of Cases.
Hume.....	Investigation by the Commission on its own motion of electrical equipment.
Butler.....	Request for additional passenger train service.
Warsaw.....	Request for additional passenger train service.
Ava.....	Investigation of equipment of railway.
Nevada.....	Request for a railway to build subway.
Holden.....	Request for railway to build depot.
Holden.....	Request for railway to protect crossing.
St. Louis.....	Two crossing protection cases.

City.	Kind of Cases.
St. Louis.	Request for railway to rebuild viaduct over crossing.
Carondelet Heights.	Request of street railway to extend lines.
St. Louis.	Separation of grades.
Delmar Crossing.	Raising or lowering of grade above or below surface for several miles.
Statewide.	Request Western Union to strike out conditions on the back of telegrams.
Sedalia.	Better service for city water.
Cape Girardeau.	Complaint of service on Northern Railway.
Columbia.	Request for railway to build turntable.
Weston.	Complaint of telephone service.
Maitland.	To compel extension of electric service in new territory.
Maryville.	Change site of depot.
Lees Summit.	Compel extension of water service.
Kansas City.	Compel Terminal Railway to build viaduct over tracks.
Lexington Junction.	Compel railway to change name of station.
Raymore.	To restore telegraph agency at station.
Springfield.	To restore passenger train service.
Linn County.	To build viaduct over grade crossing.
Statewide.	Ten cases grade crossings over railways.

No transmission line cases appear in the above list since they are applications for certificates from the Commission authorizing them to build. But in connection with such cases the Commission's engineers make physical inspection of the routes with the engineers of the utilities for the purpose of regulating the construction so as to prevent inductive interference with telephone lines, and so as to protect the public from dangerous construction in these high tension electric lines. Great activity exists in the building of electric transmission lines, the Commission having authorized the construction of about two hundred miles within the last sixty days.

Informal Complaints:

In addition to the formal cases on questions of service as above set forth, the Commission handles by correspondence a great volume of informal complaints. Every day letters are received from different parts of the state complaining about telephone connections, over-charges, placing of railway cars, et cetera. These matters are taken up by the Commission with the utilities, either by correspondence or by telephone. The Commission's informal docket shows 3100 informal complaint numbers. That is, during the past nine years the Commission has docketed 3100 of such complaints. This is an average of about one complaint per day. There are, however, a great many more than one complaint per day handled by this Commission, as

these docket numbers in a very large number of cases represent anywhere from two to fifty complainants under one number. The numbers are used for the purpose of keeping an index of the files. A single file will have numerous complaints from different persons and localities on the same subject. For instance, Docket No. 3082 represents complaints from various shippers on the Frisco Railway concerning the movement of live stock. The number of towns and the number of complaints represented by this docket number are as follows:

Town.	Number of complaints.
Dixon.....	4
Exeter.....	1
Eminence.....	1
Lebanon.....	2
Lowry City.....	2
Mansfield.....	1
Norwood.....	6
Richland.....	2
Salem.....	2
West Plains.....	2
Total towns—10.	Total complaints..... 23

The above fairly illustrates the number of individual complaints that are represented by a large per cent of the individual informal docket numbers. In addition to the fact that informal Docket No. 3082 represents 23 complaints from ten different localities, it also represents a great deal of work by the Commission. These complaints were taken up immediately by telephone with the railway company. Relief not coming rapidly enough, the Commission called the General Manager of the Frisco System to its offices for a conference, resulting in the General Manager taking personal charge of the movement of live stock which was piling up because of a drought in that territory and because of the condition of the railway resulting from the strike. Two or three days later, the movement still not progressing rapidly enough, the Commission directed its department head of transportation to go to the railway's division headquarters at Springfield to make a complete check of the movement of freight on the system to determine the true facts. Resulting from this investigation, the Commission sent out a general letter setting forth the facts and making suggestions to shippers to procure cooperation in the movement of livestock. The appreciation of

the live stock shippers is indicated by two out of several letters which the Commission received and found in this file, to-wit:

“West Plains, Missouri,
Oct. 6th, 1922.

“Public Service Commission:
Dear Sir:

Answering will say, we got our shipments out Tuesday last, in good shape, and the agent here told me yesterday he had caught up with all the orders for cars, and had eight cars left not used.

Thanks.

(Signed) MARK SUMMERS.”

“Norwood, Missouri.
10/3/22.

Public Service Commission,
Jefferson City, Mo.
Gentlemen:

We thank you very kindly for the nice letter of tne 27th ult, and also your efforts in getting stock cars here at Norwood. Pleased to advise you that the R. R. Company set out 21 cars here for use on Monday, the 2nd, and all are being loaded.....

Now if we can have cars along as ordered we will not have any more congestion like we are just passing through with.

In behalf of the live stock shippers and also the farmers I want to thank you very kindly for your help and assure you that we all appreciate your assistance very much, we are,

Sincerely yours,

(Signed) J. M. RYAN,
Cashier.”

The Commission through the handling of these informal complaints is receiving letters every day, which may be found in the files of the Commission, from those whose complaints have been satisfied by the Commission taking the matter up directly with the utilities. The detailed nature of these subjects may be learned by reference to the appendix appearing in the annual reports of the Commission. However, a few samples of these letters would not be out of place herein.

“Fairfax, Missouri,
September 13, 1922.

“Public Service Commission,
Jefferson City, Missouri.
Dear Sirs:

In regard to our Telephone Service, I wish to thank you. They installed a new 'phone and we can get fair service now. You did in two weeks what I had been trying to do in six months.

.....
(Signed) V. W. DuVALL.”

"Sedalia, Missouri.
September 15, 1922.

"Public Service Commission,
Jefferson City, Missouri.
Gentlemen:

Replying to yours of the 14th, wish to say that complaint which I reported to the Commission, regarding City Light & Traction Company refusing me light service. That upon receipt of your letter and per your instructions I had an interview with Mr. H. C. Feuers, General Manager of the Company. We went over the matter thoroughly and the result was Mr. Feuers made acknowledgment of the fact that I was absolutely correct in my contention and that I should be accorded service. I also wish to commend Mr. Feuers in the manner of which he handled the matter and that in less than 24 hours I was burning lights all O. K. I also wish to express my hearty appreciation to the Commission for their assistance.

Thanking you and, with best wishes, I am

Very Respectfully,

MR. JOHN SCHMIDT,
1503 West 20th Street,
Sedalia, Missouri"

"Quincy, Illinois,
Feb. 15, 1922.

"Mr. C. B. Bee,
Public Service Commission,
Jefferson City, Mo.
Dear Sir:

We have just received copy of authority No. 814 issued by the Public Service Commission on Feb. 9th, with reference to rates on egg case material from Caruthersville to points in Missouri more than 500 miles distant.

I want to assure you that we deeply appreciate the way in which this matter has been handled by the Public Service Commission. I understand the rates are to become effective on Feb. 24th.

Yours truly,

QUINCY NORTH STAR CO.,

Per (Signed) E. P. Lamman."

"Old Monroe, Mo.
April 6, 1922.

"Public Service Commission,
Jefferson City, Mo.
Gentlemen:

We wish to inform you that the Southwestern Bell Telephone Company has placed door on telephone booth located in our store, and that the work is satisfactory in every respect.

Thanking you for your prompt action in taking up our complaint, we remain,

Yours respectfully,

(Signed) WESTHOFF & WEHDE,
By Chas. R. Clemmons, Admr."

"Gordonville, Missouri,
2-10-22.

"Public Service Commission,
Jefferson City, Mo.

Gentlemen:

In behalf of the traveling public, we thank you that through your efforts, arrangements are made by the Mo. Pacific Railroad Co. to keep the waiting room open on Sunday and to provide sufficient coal so that patrons may keep the fire burning. We assure you that this will be appreciated very much.

Yours truly,

GORDONVILLE MILLING CO.,

(Signed) Wesley A. Deneke, Secy."

"St. Louis, Missouri,
March 30, 1922.

"Mo. Public Service Commissioner,
Jefferson City, Mo.

Gentlemen:

On the 17th inst. I caused a letter to be sent to you complaining of the poor quality of Fuel Gas being supplied to its patrons by the Laclede Gas Light Company of this city and petitioned your Honorable Commission for immediate relief.

You caused an immediate inspection to be made by the Gas Company and to their credit be it said that they apparently did their work thoroughly, first giving the piping a thorough cleaning.

We wish to thank you for your prompt attention and also Mr. Burns of the Laclede Gas Light Company, for the attention given to this matter.

Yours very truly,

(Signed) F. J. ROLFES,

3427a Crittenden Street."

Anyone who may desire to read the many letters of thanks which the Commission has in its files can have several days of interesting reading made available by calling at the offices of the Commission.

The Commission has consistently at all times insisted that the utilities render good service. A very large per cent of individual complaints result because of misunderstandings and on account of lack of courtesy on the part of clerks and employees. The utility managers have been told both publicly and privately by the Commission that a large part of public ill will is due to the fact that the managers have not given sufficient attention to courteous treatment of the public. The Commission has gone so far as to direct a utility to discharge an employee. Anyone who feels he has a just individual complaint can have his just rights respected by merely dictating a letter to the Commission.

Franchise Rates:

The setting aside by the Commission of franchise rates is probably the least understood of any duty of the Commission, and has resulted in more criticism and opposition to the Commission than any other fact. It is, therefore, proper that something should be said on this subject.

The law as interpreted by the courts casts a duty on the Commission to set aside franchise rates where the evidence is clear and convincing that such rates are insufficient to render adequate service, or are so high as to be unreasonable or exorbitant. One of the theories on which the law was based is that the utility is rendering and furnishing a public necessity which the utility is not at liberty to discontinue at pleasure as in the case of private business. The utility must continue to furnish the service whether it be profitable or unprofitable until the state, through its Commission, gives its consent to cease operation. The regulation of public utility service comes within the police power of the state, and all contracts or franchises accepted by a utility or granted by a city are subject to the regulatory police power of the state. The police power is exercised to compel continuity of service and to prevent the deterioration of the service.

For a manufacturing concern to sell all of its product at a loss would soon result in the discontinuance of manufacturing the product or in the production of an inferior product. To procure continuity of service and to keep up the standard of service which the public has a right to demand, the state steps in with the exercise of its police power, and not only requires the utility to render the service, but fixes the conditions so that it is physically possible for it to do so. Thus it becomes the duty of the state regulatory body to increase franchise rates if necessary to enable the utility to pay operating expenses and procure capital to continue the service. The utility, being under regulation and enabled to earn only a fair return, cannot in prosperous times and good operating conditions reap a harvest, as private business is free to do, to tide it over in times of adversity.

Further, the law has always held that the police power of the state is available to protect its citizens against exorbitant rates and charges. This power has not been surrendered by the state to the cities so as to enable a city council to vote a franchise to a utility fixing an unconditional charge for service,

even though this franchise rate be ratified by a vote of the people, for the reason that it is not only entirely possible, but it has quite often happened that unreasonable rates and discriminatory rates, casting an undue burden upon one class of consumers and a special privilege upon another class, have been granted by franchise. Again, on account of the advancement of the art by invention and discovery or by decrease in operating costs, rates established by a franchise for a fixed number of years may and have become highly exorbitant rates prior to the expiration of the franchise. In such cases the state has retained its police power to protect its citizens against such exorbitant rates, and steps in to reduce the same to a reasonable basis.

It follows that if the state exercises the police power to reduce franchise rates for the protection of the public, it likewise could exercise that power to raise rates where the public service demands it should be done.

The above are some of the reasons why the courts have held that franchise rates are subject to the exercise of the police power by the legislature or by a public service commission created by the legislature. There are other purely legal reasons on which the courts have based their decisions. The Supreme Court of Missouri in what is known as the "Sedalia Case", reported in 275 Mo. 201, used this language concerning the duty of this Commission:

"It is, however, clear that under our Section 5 of Article 12 of the Constitution of 1875 (a section not theretofore found in our Constitution) the Legislature itself cannot abridge the police power of the State. Nor can it authorize a municipal corporation to make a contract abridging or limiting such police power. So that if, as we have held, the fixing of rates for public service is an exercise of the police power, then under other rulings cited above the Public Service Commission had a right to fix reasonable rates irrespective of the alleged contract. The great weight of authority so holds..... Under it the sovereign police power of the State is preserved intact, irrespective of contracts with reference to rates for public service. Under it no contract as to rates will stand as against the order of the Public Service Commission for reasonable rates, whether such reasonable rates be lower or higher than the contract rate."

Again the same court in an opinion reported in 281 Mo. 52, l. c. 59, used the following language:

"In the exercise of this great law-making function the state is not obstructed by contract between one of its agencies (cities, towns or villages) and other persons, for the reason that the state cannot alienate any of its sovereign powers which are necessary to the public welfare or essential to the health, morals and protection of its citizens. As an obvious corollary of this principle,

no municipality is allowed by ordinance or contract to impose upon a public utility essential to the welfare of the people conditions of operation or maintenance which would confiscate its property or destroy its power to serve the public."

Again in a case reported in 276 Mo. 539, l. c. 549 and 550, the court said:

"The Commission is authorized to enforce orders for the operation of the system in such manner as to render adequate service. That this cannot be done without income sufficient to pay operating expenses and fixed charges is apparent, without reference to the manner in which the adequate return is fixed. It was a matter of common knowledge that the franchise street car fares existed pretty generally. The legislature passed this act in view of this situation."

It appears from the above that the duty under the law rests upon the Commission to fix reasonable rates by lowering or raising, as the case may be, even though it involves the changing of franchise rates. The Commission, however, has taken this view: that it will not exercise this duty except where the evidence is clear and convincing that it should be done.

This further fact should be stated. During the high price period a great many utility franchises were granted, particularly to electric companies. These franchises stipulated for much higher rates than ordinarily existed prior to the war. The rates therein were based on operating expenses as of the time the franchises were granted. Prices since have started on the decline and, if they continue to decline, as they have after every great war, it will soon come to pass that these cities will apply to the Commission for a reduction in these franchise rates. One such city has already applied to this Commission, and investigations are now being made therein. The public will find that the Commission will be more willing to make decreases in franchise rates than it was to increase them in the past. It will be more willing because it will be far easier to do so. What situation would these communities now be in if the arm of the state through a public service commission were not there to adjust these rates along with the changes in prices as they occur.

IN CONCLUSION:

There is no governmental department whose work is so little understood by the public as this Commission, yet in truth there is no department of the state that performs a greater service, that affects and protects the daily civil rights of the public

as does the Public Service Commission. In its nine years of operation, during a period when it was frequently compelled to increase rates, not a single decision has been reversed by the Supreme Court of this state on the ground that the rate fixed by the Commission was unreasonably high, while numerous decisions of the Commission on application of the utilities have been reversed and set aside by the courts on the ground that the rates fixed by the Commission were so low as to result under the constitution in the confiscation of the property of the utility. This fact conclusively indicates that the doubts are resolved by the Commission in favor of the public. If the Commission has failed in its duty to protect the rights of the public in regard to rates, then likewise have the city officials of the respective communities failed in not appealing the decisions of the Commission to the courts, and the courts have failed in their duty by sustaining the Commission's decisions in cases that have been appealed by public officials.

The importance of the work and the astounding effects which the acts of these regulatory bodies would and do have, not only upon the utilities themselves but those who are interested therein directly or indirectly, demand that these commissions act only after careful investigation in accordance with well established rules of law and equity. Capricious action could only have the most direful results for the public, and unjust and unfair treatment of the utility would redound to the detriment of the public.

It would not be out of place to set forth some facts not generally known or, if known, not thought of. Approximately 1,500,000 private citizens of the United States have part or all of their savings invested in the securities of electric companies. The insurance companies have upwards of \$350,000,000 invested in these same securities, which investment represents the assets behind life insurance policies held by the heads of families as a competence to their children and widows in case of death. Likewise, the 27,000,000 depositors of the banks of the country have as security behind their deposits investments by banks of approximately \$2,000,000,000 in utility securities. These deposits represent the savings of the average man and his dependents. The electric light and power industry represents an investment estimated at \$5,000,000,000, and furnishes employment to one-half million employees, the welfare of whose families depends upon their savings and their

employment. This industry annually consumes 38,000,000 tons of coal and 13,000,000 barrels of oil, and it pays \$3,225,000,000 for labor and materials, while the cost of light now consumed by the average householder is but little greater than the cost of the inefficient candle light of our fathers of a generation or two ago. Four billion dollars are invested in gas plants in the United States. The total amount paid for gas consumed, while an enormous amount, is less than the public pays for cigarettes and soda water. To produce this gas 12,000,000 tons of coal and 1,000,000,000 gallons of oil are consumed. Electric railways of the United States employ 300,000 people and have \$6,000,000,000 invested in the property, carrying 12,000,000,000 passengers annually.

Localizing the matter, we find that in 1920 the combined investment in Missouri in electric, gas, water, heating and street railway plants was about \$350,000,000 and their gross operating revenue was about \$60,000,000, and had in their employ about 20,000 employes. That in addition to the above there was invested in telephone systems about \$65,000,000 with about 8,000 women and 5,000 men employed. Large extensions and further investments have since been made. These companies pay to labor in this state and for materials and supplies about \$90,000,000 annually, and in 1921 paid \$6,492,290 in taxes.

The foregoing facts are set forth for only one purpose, namely, to call attention to the importance of the subjects and the varied interests and rights that are affected by the decisions of the Public Service Commission. These are serious matters and are not to be disposed of by the waving of the hand, nor by what the Commissioners personally may wish to do in the matter, nor by what uninformed people may demand that they do, but must be controlled by the constitutions of the state and the United States and the statutes enacted by the General Assembly creating the Commission. In other words, the law as applied to the true facts, interspersed with common sense and justice, must and should control, and any commission or court that deals with the subject on any other basis would be entitled to the condemnation of all right-thinking people and would be so condemned by the citizenry of this great state.

HISTORICAL.

**Appointments—Time of Service of Each Commissioner—
Membership of Commission to October 1, 1922.**

The law creating the Public Service Commission of Missouri was introduced by Senator Wm. G. Busby of Carroll County. This law became effective April 15, 1913. By its provisions the Commission shall consist of five (5) members to be appointed by the Governor, with the advice and consent of the Senate, one of whom shall be designated by the Governor to be Chairman of the Commission. One of said Commissioners shall hold office for two years, two shall each hold office for four years and two shall each hold office for six years; that upon the expiration of each of said terms each Commissioner thereafter appointed shall hold office for a term of six years from the beginning of their terms. Vacancies in said Commission shall be filled by the Governor for the unexpired term.

Effective April 15, 1913, there were appointed:

FRANK A. WIGHTMAN, railroad expert, of Monett, Mo., for a term of two years, ended April 15, 1915.

JOHN KENNISH, lawyer, of Kansas City, Mo., for a term of four years, ended April 15, 1917.

HOWARD B. SHAW, electrical engineer, of Columbia, Mo., for a term of four years, ended April 15, 1917.

JOHN M. ATKINSON, lawyer, Chairman, of Doniphan, Mo., for a term of six years ended April 15, 1919.

WILLIAM F. WOERNER, lawyer, of St. Louis, Mo., effective July 3, 1913, for a term ending April 15, 1919.

WILLIAM F. WOERNER, resigned, effective November 18, 1914; and

EDWIN J. BEAN, lawyer, of DeSoto, Mo., effective November 19, 1914, was appointed for the unexpired term ending April 15, 1919.

FRANK A. WIGHTMAN, resigned, effective April 24, 1915; and

EUGENE McQUILLIN, lawyer, of St. Louis, Mo., effective April 24, 1915, was appointed for a term ending April 15, 1921.

JOHN M. ATKINSON, Chairman, resigned, effective May 1, 1916; and

WILLIAM G. BUSBY, lawyer, of Carrollton, Mo., effective May 1, 1916, was appointed for the unexpired term, ending April 15, 1919, and named as Chairman of the Commission.

EUGENE McQUILLIN, resigned, effective February 21, 1917; and

*DAVID E. BLAIR, lawyer, of Joplin, Mo., effective February 26, 1917, was appointed for the unexpired term, ending April 15, 1921. Resigned August 23, 1920, effective immediately.

*David E. Blair was elected Judge of the Supreme Court November 2, 1920.

NOAH W. SIMPSON, lawyer, of LaBelle, Mo., effective April 15, 1917, was appointed for a term ending April 15, 1923, vice John Kennish, whose term had expired.

EDWARD FLAD, civil engineer, of St. Louis, Mo., effective April 15, 1917, was appointed for a term ending April 15, 1923, vice Howard B. Shaw, whose term had expired. Resigned, effective October 11, 1921.

A. J. O'REILLY, civil engineer, St. Louis, effective October 11, 1921, appointed for unexpired term ending April 15, 1923.

JOHN KENNISH, lawyer, Kansas City, effective August 23, 1920, was appointed for unexpired term ending April 15, 1921. Resigned, effective December 1, 1920; and

JOHN A. KURTZ, lawyer, Kansas City, effective December 1, 1921, was appointed for unexpired term ending April 15, 1921. May 1, 1921, was appointed for full term of six years ending April 15, 1927, and named Chairman of the Commission, vice Wm. G. Busby, resigned.

WM. G. BUSBY, Chairman, resigned, effective May 1, 1921; and

HUGH McINDOE, lawyer, Joplin, appointed for unexpired term ending April 15, 1925.

Membership of the Commission for Period of Time Named.

From April 15, 1913, to July 3, 1913:

JOHN M. ATKINSON, Chairman;
JOHN KENNISH,
HOWARD B. SHAW,
FRANK A. WIGHTMAN.

From July 3, 1913, to November 18, 1914:

JOHN M. ATKINSON, Chairman;
JOHN KENNISH,
HOWARD B. SHAW,
FRANK A. WIGHTMAN,
WILLIAM F. WOERNER.

From November 18, 1914, to April 24, 1915:

JOHN M. ATKINSON, Chairman;
JOHN KENNISH,
HOWARD B. SHAW,
FRANK A. WIGHTMAN,
EDWIN J. BEAN.

From April 24, 1915, to May 1, 1916:

JOHN M. ATKINSON, Chairman;
JOHN KENNISH,
HOWARD B. SHAW,
EDWIN J. BEAN,
EUGENE McQUILLIN.

From May 1, 1916, to February 21, 1917:

WILLIAM G. BUSBY, Chairman;
JOHN KENNISH,
HOWARD B. SHAW,
EDWIN J. BEAN,
EUGENE McQUILLIN,

From February 21, 1917, to February 26, 1917:

WILLIAM G. BUSBY, Chairman;
JOHN KENNISH,
HOWARD B. SHAW,
EDWIN J. BEAN.

From February 26, 1917, to April 15, 1917:

WILLIAM G. BUSBY, Chairman;
JOHN KENNISH,
HOWARD B. SHAW,
EDWIN J. BEAN,
DAVID E. BLAIR.

From April 15, 1917, to December 1, 1918:

WILLIAM G. BUSBY, Chairman;
EDWIN J. BEAN,
DAVID E. BLAIR,
NOAH W. SIMPSON.
EDWARD FLAD.

From August 23, 1920, to December 1, 1920:

WILLIAM G. BUSBY, Chairman;
EDWIN J. BEAN,
NOAH W. SIMPSON,
EDWARD FLAD,
JOHN KENNISH.

From December 1, 1920, to May 1, 1921:

WM. G. BUSBY, Chairman;
EDWIN J. BEAN,
NOAH W. SIMPSON,
EDWARD FLAD,
JOHN A. KURTZ.

From May 1, 1921, to October 11, 1921:

JOHN A. KURTZ, Chairman;
EDWIN J. BEAN,
NOAH W. SIMPSON,
EDWARD FLAD,
HUGH McINDOE.

From October 11, 1921, to September 30, 1922.

JOHN A. KURTZ, Chairman;
EDWIN J. BEAN,
NOAH W. SIMPSON,
HUGH McINDOE,
A. J. O'REILLY.

LEGAL DEPARTMENT.

The department, constituted as heretofore, consists of the General Counsel and Assistant Counsel to the Commission, and one stenographer.

The following shows the nature of the proceedings had in the various suits begun, ending or disposed of during the period beginning December 1st, 1920 and ending September 30th, 1922, and which have been in charge of this department.

1. **Caruthersville Train Case:** At the time the last report was made, this case, involving the validity of an order of the Commission requiring certain train service at Caruthersville, Mo., was pending on appeal in the Supreme Court of the

United States, from a decision of the Supreme Court of Missouri, which sustained the order of the Commission. On the 17th of January, 1921, the Supreme Court of the United States rendered its decision reversing the judgment of the Supreme Court of Missouri and setting aside the order of the Commission. (254 U. S. 535.)

2. Webb City & Carterville Water Case (Federal Court):

At the time of the last report, this case was pending upon an interlocutory injunction, granted by the United States District Court, enjoining the Commission from enforcing certain orders it had made, fixing rates for water in Webb City and Carterville, and from interfering with the Company in putting in a certain schedule of rates. The case came on for a final hearing at Jefferson City, at the March term, 1921, of the United States District Court. Upon a partial hearing of the case, the Court declined to proceed further at that time and made an order directing the Water Company to renew its application to the Commission to fix rates. The Company did so, and the proceedings in that behalf have been held by the Commission, but the matter not being finally determined before the Commission, the suit has not yet been finally disposed of. Pending the suit, the Company is required to make a quarterly report to the Court, showing the charges collected by it from its consumers under the order of the Court in excess of those formerly authorized by the Commission.

3. Webb City & Carterville Water Case (Circuit Court):

This suit, brought in the Circuit Court of Cole County, to review an order of the Commission fixing water rates at Webb City and Carterville, was pending at the time of the institution of the suit last mentioned in the Federal Court. It has not been brought to trial, pending and on account of certain negotiations between the cities of Webb City and Carterville, and the Water Company, and pending also the suit above mentioned in the Federal Court.

4. Union Electric Light and Power Company Cases:

These cases, eighteen in number and of like character, were brought in the Circuit Court of Cole County, Missouri, in April, 1919, by certain large consumers of the company in the City of St. Louis to review and set aside an order of the Commission granting an increase to the Company in rates for heat furnished. These cases were heard together on the 31st day of

October, 1919. Later the Circuit Court set aside the orders of the Commission. Appeals were taken by the Commission and the Company. The cases were briefed and argued at the April term, 1921 of the Supreme Court, but no decision has been handed down.

5. **Mountain Grove Train Service Case:** This case, involving the validity of an order of the Commission requiring certain train service to be rendered at Mountain Grove, Missouri, by the St. Louis-San Francisco Railway Company was, at the time of the last report, pending on appeal taken to the Supreme Court by the Railway Company. A decision was handed down by Division No. 1 of the Supreme Court in July 1920, sustaining the order of the Commission. Upon a motion for a re-hearing, filed by the Railway Company, the case was transferred to the Court in Banc. It was again briefed and argued before the Court in Banc at the October term, 1920, and the judges were equally divided (Judge David E. Blair not sitting). Judge Thomas J. Seehorn was selected as a special judge to sit in the case and it was again briefed and again orally argued before the Court in Banc at the October term, 1921, and in November, 1921, a decision was rendered, sustaining the order of the Commission. (235 S. W. 131.) The case has been taken to the Supreme Court of the United States, upon writ of error, sued out by the Railway Company. A hearing will probably be reached in the spring of 1923.

6. **Kansas City Light and Power Company Heating Rate Case:** This case is a suit brought in the Circuit Court of Jackson County by Mary B. Case, et al., to review an order fixing rates for electric and heating service and was at the time of the last report pending in the Circuit Court of Jackson County. The case was heard at Independence by Judge Hall of the Circuit Court of Jackson County, in February, 1921, was taken under advisement, was again argued in March, 1922, and later a decision rendered setting aside the order of the Commission. An appeal was taken to the Supreme Court and the case set for hearing on the October docket, 1922.

7. **Southwestern Bell Telephone Case:** This is a suit involving the validity of an order of the Commission made November 26, 1919, cutting out certain charges for installation and moving of phones established by the Postmaster General. At the time of the last report, it was pending in the Supreme Court,

on appeal taken by the Company from the Circuit Court of Cole County. It was heard by the Court in Banc at the January call, 1921, and later a decision rendered, sustaining the orders of the Commission. (233 S. W. 425.) The Telephone Company has taken and perfected an appeal in this case to the Supreme Court of the United States and it is expected that it will come on for hearing in the latter Court about the 1st of December, 1922.

Pending final determination in this suit, the Company, under orders of the Courts having jurisdiction, has been required to impound the excess charges collected by it, and is now doing so, and approximately \$500,000.00 of these charges in dispute have been deposited in the bank to await the result of a final determination.

8. **Capital City Water Company Case:** This is a suit by the Company owning the waterworks system in Jefferson City to review and set aside the orders of the Commission fixing the valuation of the company's property, and also prescribing rates. At the time of the last report, this case was pending on appeal in the Supreme Court. It was heard by the Court in Banc at the January call, 1921. In this case the judges also were equally divided in opinion (Judge David E. Blair not sitting). A special judge was selected to sit in the case and it was again argued at the January call, 1922. No decision has been handed down.

9. **Willow Springs Switch Track Case:** This, a proceeding in mandamus to compel the St. Louis-San Francisco Railway Company to construct and operate a switch track for the Creamery Company at Willow Springs, in Howell County, was at the time of the last report pending in the Circuit Court of Henry County. It was founded upon an order made by the Commission against the Director General of Railroads, while the property was under Federal control. The Circuit Court of Henry County rendered a decision adverse to the Commission, and an appeal was taken to the Supreme Court on behalf of the Commission. Later, upon the request of the Creamery Company, and its attorney, the appeal was dismissed.

10. **Richards Switch Track Case:** This is a suit brought in the Circuit Court of Jackson County by J. F. Richards of Kansas City to set aside an order of the Commission directing the Union Pacific Railway Company to switch cars over a track extending from the tracks of the Union Pacific Company across

Hickory Street in Kansas City, thence across the rear end of lots owned by Richards, and over the rear end of other lots in the same block severally owned by other persons.

The contention of Mr. Richards is that the portion of the track over his lots is his private property; that without his consent the railway company cannot run cars over this portion of the track to reach the more distant lots; that he is entitled to charge the other owners of lots a rental.

At the time the last report was made, this case was pending in the Circuit Court of Jackson County. Upon a hearing in February, 1921, that Court set aside the order of the Commission. An appeal, on behalf of the Commission, was taken to the Supreme Court and the case submitted to Division No. 1 of that Court at the October term, 1921. On March 14, 1922, a decision was rendered sustaining the order of the Commission. (239 S. W. 838.)

11. **Festus Train Service Case:** This is a suit brought in the Circuit Court of Cole County by the St. Louis-San Francisco Railway Company to review and set aside an order recently made by the Commission requiring the company to stop certain of its passenger trains at the town of Festus in Jefferson County. This case came on for hearing in July, 1921, and in September a decision was rendered by the Court, sustaining the order of the Commission. An appeal to the Supreme Court was taken by the railway company and the case heard at the April term, 1922. In June, 1922, a decision was rendered adverse to the Commission, and annulling the order.

12. **St. Joseph Gas Company Case:** This is a suit brought by the City of St. Joseph in the Buchanan County Circuit Court to review and set aside orders of the Commission prescribing charges for gas and making certain increases therein. The Circuit Court of Buchanan County set aside the order of the Commission. An appeal to the Supreme Court was taken and the case was heard on appeal at the January call, 1922, before the Court in Banc. In July, 1922, a decision was rendered which set aside the order of the Commission. A motion for rehearing was filed, which has not been passed upon.

13. **Blue Springs Light and Power Case:** This is a suit by the Blue Springs Light and Power Company brought in the Circuit Court of Jackson County to review and set aside an order of the Commission granting to the Green Light and Power Com-

pany a certificate of convenience and necessity to operate in the City of Blue Springs. This case was tried in the Circuit Court of Jackson County, Judge O. A. Lucas sitting, in February, 1921, and some weeks later a decision was rendered by him sustaining the order of the Commission. No appeal was taken from that decision.

14. **Ozark Power and Water Company Case:** This is a suit brought by the Ozark Power and Water Company to annul an order of the Commission requiring the company to extend its line into the unincorporated town of Diamond, in Newton County, and to furnish light and power to the inhabitants of the town. This case at the time of the last report had been briefed and argued in the Supreme Court, but not decided. On March 5, 1921, the Court handed down its decision, sustaining the Circuit Court of Cole County, and sustaining the order of the Commission. (229 S. W. 782.)

15. **Joplin and Pittsburg Railway Mandamus Case:** This is a suit brought directly in the Supreme Court by the Joplin and Pittsburg Railway Company versus the Public Service Commission to secure a writ of mandamus, compelling the Commission to hear and determine an application made by the company to issue certain bonds to be secured by a prior mortgage, executed by the company. The Commission dismissed the application of the company, holding that it was without power to authorize the issue of bonds founded upon transactions occurring more than five years previous to the date of making the application. The company's suit in mandamus was heard by the Supreme Court at the April term, 1921, and an opinion later handed down granting the writ. (233 S. W. 388, 833.)

16. **Road Material Rate Case:** This is a suit brought by the Atchison, Topeka & Santa Fe Railway Company and other railway companies operating in Missouri, in the Circuit Court of Cole County, to review an order of the Commission fixing the rates to be charged by the railways upon road materials consigned to Federal, County, Municipal or other public authorities. The companies applied for and secured from the Court, pending final hearing, an order suspending the rates fixed by the Commission, but requiring the companies to make report and deposit of the excess charges collected pending final determination. The case came on for trial in July, 1921, and in September a decision was rendered, sustaining the order of the Commission.

A motion for a new trial was filed by the Railway companies, which was permitted to stand pending decision by the Supreme Court of the United States in the "Wisconsin Rate Case".

Since this decision was rendered, the Interstate Commerce Commission has made its finding and order, holding that these rates constitute an undue discrimination against interstate commerce and since this order of the Interstate Commerce Commission was made, the railroad companies have filed suit in the United States District Court for the Western District against the Commission, founded upon the order of the Interstate Commerce Commission and involving the validity of the rates fixed by this Commission. The decision rendered in March, 1922, in the Wisconsin case settled the issue adversely to the Commission, and the suit in the Circuit Court was disposed of accordingly.

17. **Southeast Missouri Rate Case:** These suits, eight in number, were brought in the United States District Court by various railroad companies operating in what is known as Southeast Missouri. They were based upon a finding and order of the Interstate Commerce Commission in a proceeding before that Commission instituted by the Cairo Association of Commerce, wherein it was held that the rates in Southeast Missouri constituted an undue discrimination against the interstate commerce and against the commerce of Cairo, Illinois.

An interlocutory injunction was granted, restraining the Commission from interference with the railroad companies, putting in increased rates as directed by the Interstate Commerce Commission. Answers were filed in these suits on behalf of the Commission. These cases have not yet been tried, chiefly on account of the crowded condition of the docket of the Court.

18. **Adair County Coal Company Case:** This is a suit brought by the Chicago, Burlington & Quincy Railroad Company in the Circuit Court of Adair County, to review an order of the Commission requiring the railroad company to repair and operate certain spur tracks leading to the mines of the Adair County Coal Company and certain other companies. After several settings and continuances, the case was heard and a decision rendered, sustaining the order of the Commission. An appeal has been taken by the Railroad Company. The appeal will be reached at the April term, 1923.

19. **M., K. & T.—Liberty Street Crossing Case:** This is a suit brought in the Circuit Court of Cole County by the City of Kansas City to review and set aside an order of the Commission authorizing the M., K. & T. Railway Company to construct and operate a track across Liberty Street in Kansas City, to land already owned by the railway company, and in order that the company might extend its trackage and facilities for handling hay and other commodities. The case was heard by the Circuit Court in July, 1921, and in September a decision rendered sustaining the order of the Commission. An appeal was taken by Kansas City and also by Ellen V. Cunningham, et al., as interveners and owners of adjacent property. Upon the application of Counsel for the Commission and of the Railway Company, the time for the hearing of the appeal was advanced, and the case heard before the Court in Banc, at the January call, 1922. In July, 1922, an opinion was handed down sustaining the Commission. Motions for rehearing were filed by the appellants which have not been passed upon.

20. **Putnam County Telephone Case:** This is a suit brought by the order of the Commission in the Circuit Court of Putnam County versus the Putnam County Telephone Company to recover a penalty for refusal to obey an order of the Commission, directing the Telephone Company to install a phone. After the filing of the suit, it was found that the telephone company, after some delay and on the day the petition in the suit reached the Clerk of the Court, had installed the telephone as ordered. Upon that account, and upon payment of the costs incurred by the telephone company, the suit was dismissed upon instruction of the Commission.

21. **United Railways Arbitration Case:** This was a proceeding, instituted in the Supreme Court by Rõlla Wells, receiver of the United Railways Company, to procure a writ of mandamus, compelling the Commission to act as a board of arbitration of a wage dispute existing between the receiver and his employees. The parties concerned had agreed to submit the matter to the Commission. The Commission did not desire to undertake that duty, and upon the advice of counsel that it was not compulsory upon them to do so under the Public Service Commission Law, declined to do so; hence, the proceeding mentioned. The Supreme Court denied the writ.

22. **St. Joseph Street Railway Case:** This was a proceeding brought in the Circuit Court of Buchanan County by

the City of St. Joseph, to review orders of the Commission fixing street railway fares and rates for electric current. A return was made on behalf of the Commission. On account of negotiations and agreements between the city and the company the case was not brought to trial.

23. **Harrisonville Rate Case:** This is a suit brought by the City of Harrisonville to review and set aside an order of the Commission fixing rates to be charged by the Green Light and Power Company for electric current supplied to consumers at Harrisonville. The suit was brought in the Circuit Court of Cass County and was transferred on change of venue to Henry County; was heard by the Circuit Court of Henry County in June, 1921. A decision was rendered in July following, setting aside the order of the Commission. An appeal was taken on behalf of the Commission. An appeal was also taken by the Green Light and Power Company, which had intervened in the case. These appeals were heard together at the November call, 1921, of the Court in Banc, and a decision was rendered, December 30, 1921, sustaining the order of the Commission (236 S. W. 852).

24. **Big Springs Hotel Company Case:** This is a suit brought by the St. Louis-San Francisco Railway Company to set aside an order of the Commission requiring the stopping of certain passenger trains at Neosho, Missouri. The case before the Commission was upon an application of the Big Springs Hotel Company. The suit was heard by the Circuit Court of Cole County in July, 1921, and in September following a decision rendered, sustaining the order of the Commission.

The railway company took an appeal to the Supreme Court, and the case was heard at the April term, 1922. No decision has been handed down as yet.

25. **Glover Train Case:** This was a suit brought by the Missouri Pacific Railway Company in the Circuit Court of Cole County to set aside orders of the Commission requiring the company to construct an addition to its station building at Glover, for the accomodation of freight shipments, to keep an employee in charge of said station and to require the stopping of certain passenger trains. A hearing of the case was held in the Circuit Court of Cole County in April, 1921. The Circuit Court sustained the orders of the Commission in part and the application came back to the Commission under conditions of

adjustments, whereby the railroad company has constructed the necessary addition to its building for the accomodation of persons making or receiving shipments at Glover.

26. Coal and Road Material Rate Case: This was a suit brought in November, 1921, by the Atchison, Topeka & Santa Fe Railway and other principal railway companies operating in the State, against the Commission, in the United States District Court, to enjoin the Commission from enforcing certain orders fixing rates on coal, crushed rock, sand other like materials, and to restrain the Commission from interfering with the carriers in putting into effect certain tariffs authorized by the Interstate Commerce Commission, under its order made in Docket No. 11862.

An interlocutory injunction was granted. Afterward, the Interstate Commerce Commission made an order, based upon the order of this Commission, in case No. 2492, modifying its former order, and leaving to the State Commission power to further act upon the rates in controversy.

The action of the Interstate Commerce Commission was called to the attention of the District Court, and on June 27, 1922, an order was made by the Court dissolving the interlocutory injunction, except, that the Commission and the shipper as a class, were enjoined from bringing any suits to recover for alleged overcharges paid during the time the injunction had been in force. The case was thus finally disposed of.

27. St. Joseph Gas Company Case: This, a second suit, was brought by the City of St. Joseph to review certain orders made by the Commission subsequent to those in issue in the suit mentioned in a foregoing paragraph. A return to the writ of review issued out of the Circuit Court of Buchanan County was made in due time, but on account of the pendency of the suit before mentioned and the fact that the motions for rehearing in the prior suit are yet undetermined, the latter suit has not been brought to trial.

28. Southwest Missouri Railroad Case: This controversy is one of long standing. In 1915 the Southwest Missouri Railroad Company made application to the Commission for permission to discontinue service upon two spurs in the City of Carthage. The City intervened and resisted the application. The Commission held, upon a hearing, that it was without power to grant the relief prayed for as against the non-consent of the

City. The company sued out a writ of review in the Cole County Circuit Court. The case, thence, went to the Supreme Court and was heard, and the Supreme Court, in the view of the Commission and of this Department held that the Commission had power to hear and determine the case and to grant the relief prayed for, if the facts justified it, and the application was, therefore, remanded to the Commission for further action. The Commission held further hearings and made its report and order granting to the Southwest Missouri Railroad Company permission to abandon the spur mentioned in the application. The City of Carthage sued out a writ of review of this order and the case was heard in the Cole County Circuit Court in June, 1922, and a judgment rendered sustaining the Commission. The City has taken an appeal to the Supreme Court. The case, in natural course, will be heard at the April Term, 1923.

29. **Kansas Natural Gas Company Case:** This is a suit brought by the Public Service Commission in the name of the State and joining also the Attorney General against the Kansas Natural Gas Company in the United States District Court for the Western District of Missouri. The Kansas Natural Gas Company furnishes the supply of natural gas to the local gas companies, operating in Kansas City, Joplin and certain other smaller towns in Missouri. In April, 1922, the Kansas Natural Gas Company gave notice to the local companies that it would thereafter demand and charge an increase of 5 cents per thousand cubic feet for natural gas supply to the local companies and that unless such increase was paid it would refuse longer to furnish gas to the company or companies so refusing to pay.

This increase was demanded without asking the permission of the Public Service Commission. The Kansas Natural Gas Company procures its supply of gas from Oklahoma and Kansas; none of it is obtained in Missouri. The Kansas Natural Gas Company denied and denies that this Commission has any power over its operations or over the rates it may charge for natural gas to local companies operating in Missouri. A restraining order was obtained from Judge Van Valkenburg, restraining the Natural Gas Company from shutting off the supply of gas, pending a hearing of the case. The case was heard by the District Judge, Judge Van Valkenburgh, at Kansas City, Missouri, on the 26th of June, 1922. The Kansas City Gas Company intervened in the suit, as a co-plaintiff, with the Commission. The Court held that this Commission was without

power to regulate the rates for gas to be charged by the Kansas Natural Gas Company essentially upon the ground that the company was engaged wholly in interstate commerce and had no franchise from the State of Missouri or from any City in this State whereby it assumed the obligation in this State of a public utility company. On the 20th day of September, 1922, this department procured from the Court an order allowing an appeal in the case to the Supreme Court of the United States. The record in appeal is now in course of preparation.

30. Louisiana Water Company Case: This is a suit brought in May, 1922, in the United States District Court, by the Louisiana Water Company against the Commission, seeking to enjoin the Commission from interfering with the company in putting in force higher rates for water service in the City of Louisiana, and particularly higher charges to the City of Louisiana for hydrant rentals.

A hearing of the application for an interlocutory injunction was had in Kansas City in May, 1922, and the Court granted an interlocutory injunction against the Commission. Upon the suggestion of this Department the City of Louisiana has asked permission to intervene in the suit and an order was made by the United States District Court at its regular October Term, 1922, permitting the city to intervene, file its answer to the bill of the company and take part in the defense of the case, as a formal party. It is the purpose of this department to endeavor to bring the case to an early hearing upon its merits.

31. Citizens Gas Company Case: This is a suit brought by the Citizens Gas Company of Hannibal, Missouri, against the Commission, in the United States District Court. The suit is founded upon the allegations that the valuation fixed by the Commission is unreasonably low and operates to confiscate its property and that the rates prescribed by the Commission to be charged by the Company are confiscatory. This suit was filed in June, 1922, but the application which the company made for an interlocutory injunction was not acted upon by the Court. Answer was filed by this Department for the Commission in due time. At this time the case is set for hearing on November 9, 1922, at Kansas City.

32. Discontinuance of Passenger Trains Case: This suit is one brought for the Commission in the Circuit Court of the City of St. Louis, against the St. Louis-San Francisco Railway

Company, to enforce an order of the Commission made in July, 1921, which prohibited any railroad company to discontinue any passenger train operated in the State of Missouri without first securing, from the Commission, permission to discontinue such train. The case was heard by Judge Hall of the Circuit Court of St. Louis in January, 1922, and afterwards a decision rendered by him against the Commission and holding the general order upon which the suit was founded to be invalid. An appeal was taken for the Commission to the Supreme Court. The case was set down for hearing upon the October Docket, 1922, in Division No. 1 of the Supreme Court, but on account of the Federal question involved has been transferred to Court in Banc and the Court has ordered set down for hearing at the January call, 1923. This motion has been sustained and the case set for hearing at the time mentioned.

33. **Turner Road Crossing Case:** This is a suit brought by the Wabash Railroad Company to set aside an order of the Commission made upon the application of W. M. Turner, Road Overseer, in Carroll County for the construction of a grade crossing of the Wabash Railroad Company for a public road. The suit is pending in the Circuit Court of Cole County and has not yet been heard.

34. **Nelson-Bunceton Service and Rate Case:** This is a suit brought in the Circuit Court of Cole County by A. W. Nelson et al., to review and set aside an order of the Commission, fixing the rates for electric current to be paid by Nelson and his associates, and directing that Joseph Schwickrath as successor to the Bunceton Ice, Light and Fuel Company furnish electric service to Nelson et al., at the rates so prescribed. Upon the hearing the Court sustained so much of the order as required Schwickrath to furnish the service, but set aside so much of the order as increased the rates, to be paid by Nelson et al., beyond the former rates, and remanded the case to the Commission in order that a further hearing might be held upon the subject of the rates to be paid.

35. **Kansas City Telephone Case:** This was a suit brought by Kansas City and certain individuals in the Circuit Court of Jackson County, Missouri, to set aside an order of the Commission granting certain increases in rates to the Kansas City Telephone Company. The writ of review was issued and a return thereto prepared and made by this department. The

case, however, after pending for several months, has recently been dismissed by the relators.

Additional Duties: In addition to having charge of all matters in the Courts, this department in the course of its duties has investigated all questions submitted to it and rendered opinions thereon; has, when requested, prepared forms of orders, or forms of complaints or applications in matters that come before the Commission, and has attended to such correspondence as has been referred to the department by the Secretary or any Commissioner, particularly those having to do with inquiries involving legal questions. All returns to writs of review sued out of the Courts have also been prepared by the Legal Department. The members of this department have also, when requested, held hearings in cases before the Commission, and written reports thereon for the consideration of the Commission.

RAILROAD DEPARTMENT.

The Railroad Department of the Public Service Commission has jurisdiction over transportation companies, i. e., railroads, street railways, interurban, express and sleeping cars.

Common Carriers Reporting to the Commission.

Steam railroads.....	59
Electrical interurban railroads.....	9
Electrical street cars.....	14
General express companies.....	1
Local express companies.....	4
Sleeping car companies.....	1

The Railroad Department of this Commission has two separate classes of work: First, supervision of rates, and second, service.

The supervision of rates includes the checking of all tariffs filed by the carriers, the quotation of rates to the general public, the informal ruling upon the proper application of tariffs and the furnishing to the Commission of data in connection with formal cases involving rates between points in the state.

Under the heading of rates the Chief of this Department represents this Commission before the Interstate Commerce Commission in all rate matters, being charged with the preparation of exhibits, attending the hearings and filing final briefs in such cases.

The subject of supervision of service covers all transportation matters, except grade crossings and valuation of such

utilities. The Department must keep informed as to the train service in all parts of the State and informally investigate complaints as to train service, depots, switch track facilities and the furnishing of cars and transportation of freight.

The personnel of this Department comprises a chief and one assistant.

General Rate Conditions Within the State: All freight rates in the State were advanced June 25, 1918, by the Director General of Railroads and this advance approximated 25 per cent. After the world war the carriers' properties were returned to them with the cost of transportation materially increased by reason of heavy advances in wages and the general increase in cost of materials and supplies. After a thorough investigation the Interstate Commerce Commission authorized, at the end of the Federal Guarantee period, September 1, 1920, in the territory in which Missouri is located, an increase of 35 per cent.

This Commission did not agree with the advances made by the Interstate Commerce Commission, effective September 1, 1920, and refused to permit these advances to become effective on Missouri state traffic. This Commission did authorize certain advances but was of the opinion that the advances authorized by the Interstate Commerce Commission on coal, chats, sand, gravel, crushed rock, cement, brick, petroleum and its products and similar heavy loading commodities were too high. The carriers then applied to the Interstate Commerce Commission under Section 20 of the Transportation Act, for an order authorizing the increase of Missouri state rates. This order was issued, effective December 15, 1921, and thereafter the carriers applied to the Federal Court for the Western District of Missouri and secured a restraining order prohibiting this Commission from in any way interfering with the application of the rates as authorized by the Interstate Commerce Commission.

The Supreme Court of the United States in the Wisconsin Case held that Section 20 of the Transportation Act of 1920 authorized the Interstate Commerce Commission, under certain conditions, to take jurisdiction over state rates and thereafter the restraining order above referred to was made permanent.

As a result of complaints by the various state commissions a general reduction in all rates, effective July 1, 1922, of 10 per cent, was authorized on interstate traffic.

The class rates which move practically all less-than-carload shipments were promulgated by the Railroad and Warehouse Commission in 1905 and remain in effect as maximum at this time with advances brought about by reason of world war conditions.

The commodity rates applicable between points in Missouri are, generally speaking, the rates prescribed by this Commission in 1916, and set out in the third volume of this Commission's reports subject to the advances and reductions specified above.

The passenger fare generally applicable in the United States east of Colorado on steam railroads is a minimum of 3.6 cents per mile, as prescribed by the Interstate Commerce Commission.

At a general hearing, relative to railway rates, held in Washington, D. C., in the latter part of 1921, this Commission with other western state commissions urged upon the Interstate Commerce Commission, the necessity for a reduction in the passenger fare but without success and it will not be able, under the present holdings of the Supreme Court of the United States, to reduce the fare in Missouri until the interstate rate is reduced.

Pullman Fares: At the present time the Pullman fare is 20 per cent higher than it was prior to the world war and in addition the railroad company collects 50 per cent of the Pullman charge as compensation for the transportation of the heavier sleeping car because such cars accomodate less passengers than the day coach or chair car. This rate was likewise made by the Interstate Commerce Commission and this Commission has been unsuccessful in its endeavor to have such surcharge withdrawn.

State Rates: Very few complaints have been received by the Commission as to the measure of the rates in Missouri. The coal producers in the western part of the state filed a formal complaint some months ago, asking for a reduction in the present coal rates, but the complainants have not been ready for trial. Of its own violation, this Commission has instituted a proceedings of investigation as to the reasonableness of the present rates on course road building materials, i. e., sand, gravel, etc.

It is safe to assume that the rates in Missouri, as a whole, are reasonably low as compared to the rates in surrounding states and as compared to the interstate rates to and from Missouri.

Interstate Rate Cases: The work of this Department, under this heading, has materially increased during the past year and will materially increase in future years. With the present jurisdiction of the Interstate Commerce Commission over state rates it has become necessary for the state commission to closely watch the interstate rates and during this year the Chief of this Department, accompanied by one or more members of this Commission, has participated in many rate conferences with other state commissions and has appeared at many formal hearings before the Interstate Commerce Commission requiring considerable traveling. These conferences and hearings have been held at various points and trips have been made to Memphis, Tennessee; Oklahoma City, Oklahoma; Ft. Smith, Arkansas; Topeka, Kansas; Omaha, Nebraska; Des Moines, Iowa; St. Paul, Minnesota; Springfield, Illinois; Chicago, Illinois; and Washington, D. C. Below are listed some of the more important cases, formally before the Interstate Commerce Commission, involving Missouri rates and at which this Commission has been, or will be, represented.

Rates on Newsprint Paper:

Joplin, Missouri, is the base rate for newsprint paper rates for the southwest and an endeavor was made to increase this rate. We were successful in defeating same.

Rates on Live Stock:

Nebraska points to St. Joseph and Kansas City, v. s. Omaha. The Interstate Commerce Commission in a tentative report has found that the rates to the Missouri points are too high as compared to the Nebraska destination but no formal action has yet been taken.

Coal Rates:

Kansas City and St. Joseph. The railroads serving these points from southwest Missouri, Kansas and Oklahoma points reduced the rates but the Interstate Commerce Commission suspended same. Hearings have been held but final decision has not been rendered.

Ballman-Cummings Furniture Co., et al, vs. A., T. & S. F. Ry.

Shippers at Ft. Smith, Arkansas, alleged discrimination against Ft. Smith, in favor of Kansas City, Springfield and St. Louis on shipments destined to southwest Missouri. Tentative report has been filed providing for the increase of the Missouri

state rates but the case has not yet been orally argued before the Interstate Commerce Commission.

Missouri & North Arkansas Railroad Divisions:

Application of the above named carrier for an increase in the division of through rates in order that this road might continue to operate. Decision of the Interstate Commerce Commission was favorable.

Corporation Commission of Oklahoma vs. Railroads.

Allegations of discrimination against Oklahoma points and in favor of Missouri points on rates covering grain, grain products and hay. No tentative report yet filed.

Class Rates.

Oklahoma Corporation Commission vs. the railroads, alleging discrimination against Oklahoma points and in favor of Kansas City, Joplin, Springfield and St. Louis, on all classes of shipments, other than grain, grain products, hay and cotton seed, to Missouri stations. Hearing set for November 1st. This is one of the most important cases that has been filed and if we are unsuccessful in defending this case it will cost the shippers of Missouri millions of dollars.

Grain Rates. In 1921, various western state commissions petitioned the Interstate Commerce Commission to reduce the grain rates and re-establish a differential between coarse grains and wheat. As a result of this petition the wheat rate, including commodities basing thereon, was reduced approximately 13 per cent and coarse grains, including corn, oats, etc., and the commodities basing thereon, were fixed at 90 per cent of the wheat rate. The carriers have filed application with the Interstate Commerce Commission to have this coarse grain differential removed and testimony has just been presented to the Interstate Commerce Commission at Des Moines, Iowa, in this case. If the differential is removed and coarse grains, corn and oats, are put on the wheat basis it will cost the shippers in Missouri approximately one million dollars per year in increased freight rates.

Express Rates. The Interstate Commerce Commission has opened general proceedings covering the question of express rates throughout the United States and the various western state commissions have appointed committees to present the necessary evidence at the hearing which is set for November 20th, at Washington, D. C.

Further Reduction in Grain Rates. At a conference between western state commissions held at Kansas City, Missouri, during the month of September, it was decided to present a general case to the Interstate Commerce Commission asking for a further reduction in rates on grain and grain products throughout the western territory and this case has been filed and hearing will probably be held the latter part of November. ?

Participation of this Department in Interstate Commerce Commission Cases. In the course grain rate case, in the express rate case and in the new grain case, just referred to, the Chief of this Department has been selected as the Chairman of the State Commission's Statistical and Rate Committee in charge of compilation of testimony to be presented to the Interstate Commerce Commission.

Discrimination. It is anticipated that many cases, under this heading, will be filed against Missouri rates during the next year. This class of cases allege that the lower rates applying intrastate between points in the State of Missouri discriminate against points located in adjoining states and prevent their competing with Missouri shippers. In addition to the cases above referred to there have been, or are about to be, tried the following cases:

Oklahoma Corporation Commission vs. A. T. & S. F. Ry. et al.—Rates on cotton seed.

Helena, Arkansas Traffic Bureau vs. The Missouri Pacific Railroad—Grain rates.

Weldon, Williams & Lick vs. A. T. & S. F. Ry.—Rates on paper to Ft. Smith, Arkansas.

If, in any one of these cases, the complainants are successful it will require the reduction of the interstate rate, or the advancing of the intrastate rate in Missouri.

Co-operation Between State and Interstate Commissions. As a result of the enactment of the federal law, known as the "Transportation Act of 1920", which conferred jurisdiction on the Interstate Commerce Commission, under certain conditions, over state rates a committee of the National Association of Railway and Utilities Commissioners, of which this Commission is a member, met a committee of the Interstate Commerce Commission and agreed upon a plan of co-operation in order to secure harmonious relationship of rates between state and interstate traffic. Two cases have been assigned under this head, i. e:

Cement Rates:

The Interstate Commerce Commission has tentatively found that a cement plant within the switching limits of Kansas City is not entitled to switching rates as such rates result in discrimination against cement plants located in the states of Kansas and Illinois who must move their shipments by what are known as "road haul rates". This Commission found no discrimination and the case has been assigned for conference.

Live Stock Rates.

At St. Louis, Missouri, the Interstate Commerce Commission found that rates on live stock from Missouri points to St. Louis, should be equalized with rates from the same points of origin to East St. Louis, Illinois, although the latter shipments must be delivered by a road not performing road haul service. This Commission arranged co-operative conference on this case.

Special Orders: The law requires that all rates shall remain in effect for a period of thirty days, unless the Commission shall authorize a change to be made in less time. All applications of this kind are handled under a special order file, as are applications of the carriers for authority to make refunds where, in the opinion of the carrier, an unreasonable rate has been applied. Since January 1st, ninety of these special orders have been issued. Some are issued for the purpose of correcting clerical errors but the majority are the result of informal handling between this Department and the carriers, and in every instance they are of material importance to the shippers.

Informal Complaints: Many matters are handled under this heading and satisfactory adjustment secured without resorting to formal hearing before the Commission. Approximately two hundred of these complaints are handled yearly and as the result of such handling depots are built, agents installed, additional passenger trains operated and various other matters for the good of the shippers of Missouri accomplished. For a more thorough understanding of the class of cases handled under this heading reference may be had to the subject of empty cars for the movement of live stock as fully set out in the general discussion of the work of the Commission and the complete list of such special orders will be found in the appendix.

Service: This is a broad subject and it involves all transportation conditions, except grade crossings and valuations. All applications, whether formal or informal, for the discon-

tinuance of, or for the operation of additional passenger trains, are handled by this Department and the Commission furnished information where formal complaints are docketed. The Department keeps advised of the car service conditions throughout the country and endeavors to see that Missouri lines secure their fair share of equipment during car shortages. The Department watches all train movements, in times of car shortage or in times of strikes, and endeavors to see that the available supply of empty cars is distributed to the shippers of Missouri without discrimination. It especially watches shipments to state institutions and prevents any suffering from lack of fuel or other commodities at the state eleemosynary institutions.

Work for the Coming Year: As heretofore stated the work of this Department is continually growing and becoming more important and if the Department is to be successfully operated it will be necessary to increase the force and assign to this Department a larger portion of the contingent funds of the Commission to cover traveling expenses and preparation of testimony and briefs in cases pending before the Interstate Commerce Commission. As now constituted this Department has but one employee available for these trips and during the months of October and November the following conferences, or cases, requiring trips from the office, have already been assigned:

October 2nd. Kansas City, Missouri, conference with southwestern commissions for presentation of Oklahoma class rate case.

October 7th and 9th. Des Moines, Iowa, preparation and presentation of coarse grain differential case to the Interstate Commerce Commission.

October 18th. Conference at Chicago, Illinois, with rate experts and statisticians of other states for preparation of testimony in general express hearings.

October 30th. Washington, D. C., co-operation conference with Interstate Commerce Commission.

November 1st. Oklahoma City, hearing before Interstate Commerce Commission in class rate differential.

November 8th and 9th. Kansas City, Missouri, abandonment of tracks and service by Missouri Pacific and Kansas City Southern Railways.

November 20th. Washington, D. C., presentation of general express rate case.

ENGINEERING DEPARTMENT.

This department consists of a Chief Engineer, six Assistant Engineers and one stenographer.

The duties of the Engineering Department consist of:

(a) Appraisal of all properties over which Commission has jurisdiction.

(b) All matters relating to investigation of accidents on steam and electric railways.

(c) All matters relating to protection, alteration and elimination of grade crossings.

(d) Inspection of steam and electric railway properties.

(e) Investigations to determine necessity and safety of switch and sidetrack connections.

(f) All matters relating to steam and electric railway signal systems and interlocking plants.

(g) All matters relating to steam and electric railway clearances.

(h) All matters relating to street railway traffic studies and service.

(i) Investigation relative to applications for certificate of convenience and necessity, filed by steam and electric railways.

(j) All drainage investigations.

(k) All investigations relating to necessity for filtration of water supplies, intakes, etc., and approval of plans for same.

Appraisal of Property of Public Utilities, 1921:

Appraisals of the following properties were completed during the year:

Ash Grove Electric Light and Power Company.

Hannibal Railway and Electric Company.

Citizens Gas Company of Hannibal.

Kinloch Telephone Company (St. Louis Exchange).

City Light and Traction Company of Sedalia (Electric, Railway and Gas Departments).

Lafayette Telephone Company (Lexington).

Johnson County Telephone Company (Lamonte Exchange).

Tarkio Electric and Water Company, and work has been started on the gas properties at Webb City, Carterville, Carthage and St. Charles.

Investigation of Accidents on Steam and Electric Railways, 1921:

Steam and electric railways are required to wire immediate report of accidents. These messages are followed by detailed report of accident. At the end of each month a summary of all accidents that have occurred during the month is filed with the Commission.

A careful investigation is made of all accidents resulting in injury or death. The purpose of these investigations is to determine the cause and to apply corrective measures, rather than to fix the blame.

As a result of such investigations many highway grade crossings have been protected.

Protection, Alteration and Elimination of Grade Crossings, 1921:

The following crossings have been investigated and where conditions warranted protective devices, such devices have been installed:

Chicago & Alton R. R. Co.

Selsa—1-2 mile west—Approved plans for crossing bell.

Chicago, Burlington & Quincy R. R. Co.

Hannibal—Lemon St.—Installed crossing bell.

Callao—Installed wigwag signal.

St. Joseph—20th & Olive St.—Installed wigwag signal.

Arkoe—Trees removed to improve view.

Turney—Installed secondary whistling posts.

Rosendale—Installed secondary whistling posts.

Chicago, Rock Island & Pacific Ry. Co.

Turney—Installed secondary whistling posts.

Illinois & Missouri Bridge Co.

Illmo—1-2 miles east—Installed crossing bell.

Missouri, Kansas & Texas R. R. Co.

St. Charles—Installed crossing bell.

Wainwright—Installed crossing bell.

St. Louis-San Francisco Ry. Co.

Conway—Installed crossing bell.

Gulf Junction—Installed secondary whistling posts.

General—Frisco R. R. Co. has adopted rule requiring double whistle approaching all highway crossings.

Wabash R. R. Co.

New Florence—Installed crossing bell.

Kirksville—Designed reinforced concrete subway for Normal Ave.

Montgomery City—Installed crossing bells at 2nd and 3rd Streets.

General—1921.

Railroads have agreed to have member of train crew at flag crossing when train on passing track obstructs view.

Investigation of Safety and Adequacy of Service Rendered by Steam Railways, 1921.

No inspection of the steam railroads of Missouri was made during the year 1921 for the reason that the force was inadequate to make such inspection and also carry on other more important work.

Estimate of the cost of additional Wabash passenger and freight facilities at Kirksville were made.

Q., O. & K. C. R. R. Co.—was induced to install electric lights in depot at Coffey.

Investigation of Adequacy of Service Rendered by any Public Utility, 1921.

Butler Municipal Water and Electric Plant was examined and suggestions for improving same were submitted.

Jefferson City Light, Heat and Power Company was induced to install spray cooling system to increase its condenser water supply, thereby improving its service. Tarkio Electric and Water Company's plant was examined and suggestions for improving same were submitted. These suggestions were accepted by the company and are now being carried out.

Investigation to Determine Necessity and Safety of Switch and Sidetrack Connections, 1921.

During the past year the Engineering Department was not called upon to make any investigation to determine the necessity and safety of switch and sidetrack connections.

Investigation of Signal Systems and Interlocking Plants, 1921.

A., T. & S. F.—Approved plans for protection of crossing with C., R. I & P. at St. Joseph.

C., B. & Q.—Approved plans for alterations to interlocking plant at Machens.

T. R. R. A. of St. Louis—Approved plans for alterations to interlocking plant at St. Louis.

General: Members of the Engineering Department attended hearings and assisted the Commission in preparing reports and orders in the following cases, during the year, 1921:

Cases No. 2468, 2767, 2467, 2717, 2819, 2784, 1457, 1736, 1737, 2717, 2665, 2439, 2787, 2440, 2464, 2497, 2498, 2499, 2500, 2501, 2502, 2503, 2506, 2507, 2408, 2509, 2510, 2511, 2466, 2906, 2913, 2605, 2606, 2818, 2927, 2867, 2823, 2981, 2982, 2498, 2948, 2590, 2990, 1457, 1757, 1736, 222, 224, 225, 226, 227, 273, 680, 2048, 2330, 2212, 2898, 2899, 2495, 1916, 2485, 2486, 2487, 2488, 2489, 1863, 2344, 2340, 2310, 2269, 2163, 1814, 1782, 1762, 1146, 2116, 2447, 1670, 2768, 2979, 2785, 2886, 2992, 2475, 2606, 2818, 2439, 3098, 3109, 3119, 1358, 2762, 2949, 2823, 3143, 2690, 2538, 2447, 2990, 1457, 1736, 1737, 2690.

Members of the Engineering Department assisted the State Tax Commission in appraising steam railroad property and pipe lines used for transporting oil.

The department arbitrated the difference between the City of Oregon and the St. Joseph Transmission Company over bill for electric energy.

Analysis of Accidents, 1921:

Compilation and analysis of the accident reports of the carriers to the Commission, discloses the following:

FIRST NINE MONTHS, 1921.

	Steam.		Electric.		Total.	
	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Passengers.....	3	313	1	1,019	4	1,332
Employees.....	18	870	0	40	18	910
Trespassers.....	64	101	1	17	65	118
Non-trespassers.....	69	205	22	574	91	779
Totals.....	154	1,489	24	1,350	178	3,139

Appraisal of Property of Public Utilities: 1922

Appraisals of the following properties were completed during the year:

Springfield Gas & Electric Co.—Gas Department.
St. Charles Lighting Co.
Carthage Gas Co.
Webb City & Carterville Gas Co.
Trenton Gas and Electric Co.
Rockport Light and Power Co.
Missouri Public Utilities Co. (Water at Webb City.)
Warrensburg E. L., H. & P. Co.
St. Joseph Water Co.
Water, Light & Transit Co. (Brunswick property.)
Joplin Gas Co.
Home Electric Co.—New Franklin.
Greenfield Light and Power Co.

The department is at present engaged on appraisals of the properties of the Edina Electric Company, the Edina Telephone Company, and the Kansas City Gas Company.

Investigation of Accidents on Steam and Electric Railways: 1922

Steam and electric railways are required to wire immediate report of accidents. The messages are followed by a detailed report of accident. At the end of each month a summary of all accidents that have occurred during the month, is filed with the Commission.

A careful investigation is made of all accidents resulting in injury or death. The purpose of these investigations is to determine the cause and to apply corrective measures, rather than to fix the blame. As a result of these investigations many highway grade crossings have been protected.

Investigation of Safety and Adequacy of Service Rendered by Steam Railways: 1922

No general inspection of steam railroads of Missouri was made during the year 1922 for the reason that the force was inadequate to make such inspection and also carry on other more important work.

Frisco agreed to sound double warning whistle at approach to all highway crossings.

Wabash has installed crossing bells at Second and Third Streets at Montgomery City.

Missouri Pacific agreed to place crossing bell at 39th and Holton Streets, Leeds, Missouri.

Made drawing and estimate for pagoda for Wabash depot at Kirksville.

Made field examination of proposed Third Street crossing over Missouri Pacific at Eldon.

Made field examination of proposed crossings of Washington Park Boulevard with tracks of Frisco, Missouri Pacific, Kansas City Bolt and Nut Company and the Kanss City Southern Railway Companies.

Made field examination of proposed crossings with Chicago & Alton at South Maywood.

Made field examination of grade crossings with tracks of Wabash and Rock Island Railway Companies in vicinity of Forest Park, St. Louis, which City proposes to eliminate.

Made survey for grade crossing over tracks of Missouri Pacific and M., K. & T. Railways at Market Street, Holden.

Investigation of Signal Systems and Interlocking Plants: 1922

Approved plans for C., B. & Q. interlocker at Hannibal.

Approved plans for C., B. & Q. interlocker at Keystone.

Approved plans for Frisco interlocker at Aurora.

Approved plans for Rock Island interlocker at Tindall.

Approved plans for Frisco crossing bell at Carthage.

Approved plans for Frisco crossing bell at Mountain Grove.

Approved plans for Santa Fe interlocker at Dumas.

Approved plans for Santa Fe interlocker at Camden Junction.

Approved plans for Santa Fe signals, Dumas to Medill.

Approved plans for Santa Fe signals, Camden Junction to Sibley.

Approved plans for Santa Fe signals, Camden Junction to Hardin.

General: 1922

Members of the Engineering Department attended hearings and assisted the Commission in preparing reports and orders in the following cases:

2690, 1457, 1736, 1737, 2909, 1707, 3073, 3022, 3111, 3174, 2539, 2540, 2874, 3120, 2690, 2922, 2925, 2823, 3098, 3225, 3071, 3073, 3090, 3091, 2520, 1358, 2762, 3123, 1793, 2477, 3236, 1944, 2447, 2797, 3006, 2925, 3240, 2832, 3096, 1707, 2787, 2327, 2231, 2263, 3090, 3091, 2732, 3073, 3270, 3064, 2949, 3057, 3293, 1772, 2907, 3330, 3254, 3158, 2927, 2949, 3240, 2899, 3270, 2756, 2896, 3358, 3351, 2898, 3353, 3290, 3361, 3203, 3361, 2925, 3210, 3357, 3071, 3320, 3355, 3373, 3383, 3252, 3308, 3383, 3373, 3164, 3353, 3308, 3354, 3359, 3381, 3334, 3262, 3265, 3216, 3440.

Analysis of Accidents:

Compilation and analysis of the accident reports of the carriers to the Commission, discloses the following:

FIRST EIGHT MONTHS OF 1922.

	Steam.		Electric.		Total.	
	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Passengers.....	40	475	1	791	41	1,266

DEPARTMENT OF STATISTICS AND ACCOUNTS.

Fiscal Period December 1, 1920, to November 30, 1921.

Fiscal Period December 1, 1921, to September 30, 1922.

For practically the entire year ended November 30, 1921, the personnel of this Department consisted of a Chief Accountant, two Expert Accountants, one Assistant Accountant and a Stenographer. Toward the close of the fiscal year, demands for audits of the operating results of Utilities, functioning under temporarily increased rates, became so heavy that two Assistant Accountants were added to the staff.

The personnel of this Department during 1922 consisted of a Chief Accountant, two Expert Accountants, three Assistant Accountants and a Statement Clerk. Late in the Spring of 1922, four of our staff, including two Expert Accountants, who

had been with the Commission practically since its inception, resigned to accept more remunerative employment elsewhere. The loss of these experienced men, and the difficulty encountered in securing competent successors, coming at a time when the department was deluged with work, severely taxed the small force we are able to maintain. It has been extremely difficult to secure men qualified to handle this work.

Public Utility Auditing is a specialized branch of accounting. It requires men of the highest technical training, mature judgment and wide experience.

Much of the work required of this department is pioneer effort, the invasion of hitherto untrammelled fields of apportionment, assignment and segregation. There is no source of authority to consult; we must rely on our own judgment and that judgment must be such that its decisions can withstand the searching inquisition of examination and cross-examination on the witness stand.

On the other hand, Courts and Commissions are constantly ruling upon accounting questions involved in Public Utility accounting and with such ruling we must be familiar. Here again we find the necessity of relying upon one's own judgment for Courts and Commissions do not at all times agree.

After experiencing the difficulties attending the securing and selection of accountants to replace those who left the service, we are impressed with the idea that the Commission and the public were fortunate in being able to secure and retain for so many years the caliber of men who left us this Spring; especially is this true when we consider the limited remuneration which the Commission was enabled to offer.

The regular activities of the Department might be summarized as follows:

1. Audit of books and records of Steam Railroads, Electric Railroads, Express Companies, Telephone Companies, Gas, Electric, Water and Heating Utilities, in order to ascertain Original Cost, Capitalization, Income, Expenditures, Operating Statistics and Rate of Return, to be used in Valuation, Capitalization and Rate-making cases.
2. Drafting Accounting Systems and forms of Annual Reports for Utilities.
3. Analyzing Accounting and Statistical exhibits and Evidence presented by Utilities in Valuation, Capitalization and Rate-making cases.

4. Compiling Financial and Operating data from Annual Reports of Missouri Utilities for other Commissions, Municipalities, Civic Leagues, Traffic Associations, Utilities, Brokers, Attorneys and sundry petitions for such information.
5. Compiling Comparative Statistical data from Annual Reports of Utilities.
6. Examining and Recording verified semi-annual reports of realization from Bond and Stock issues authorized by the Commission and distribution of such proceeds.
7. Examine quarterly, semi-annual and annual exhibits of the Operating Results of companies operating under temporary rates, with a view to determining whether such rates should be further extended or terminated.
8. Attending hearings and assisting the Commission in the preparation of Reports and Orders in Valuation, Capitalization and Rate Cases.
9. Advising verbally and by correspondence the various Utilities in matters pertaining to Accounts and Statistics.

Audits Made During the Year Ending November 30, 1921.

Lead Belt Telephone Company, Flat River, Missouri.

Owing to strenuous objection by the Company to the results as found by the Commission's auditors in their report dated October 11, 1920, of the operations of this Company, a supplementary audit was made which verified our previous report in detail. This latter audit was presented in evidence and testified to at a hearing held in Flat River, Missouri.

Lafayette Telephone Company, Lexington, Missouri.

The books of this Company were audited in order to determine the Original Cost of the property as of September 30, 1920, and to ascertain the Operating Revenues, Operating Expenses and Net Profit from Operations for the calendar year of 1919 and the first nine months of 1920. The results were shown in our report dated November 29, 1920, and said report was presented in evidence and testified to by a member of this Department. This audit was occasioned by an application for increased rates.

Home Telephone Company, Joplin, Missouri.

Pursuant to an application by the Company to increase its rates for telephone service in the cities of Joplin and Nevada, an audit of the records of the above Company was made in order to determine the Company's Investment as of June 30, 1920, as well as the Operating results of the two exchanges for the twelve months' period ended June 30, 1920. Various statistical exhibits were also prepared and included in the report.

Missouri Public Utilities Company, Various Plants.

An audit of the records of this Company was ordered with a view to determining the Operating Revenues, Operating Expenses and Net Profits from Operations, for the nine months ended September 30, 1920, of the following plants:

Electric, Gas and Water Plants at Cape Girardeau, Electric Plants at Charleston, Sikeston, Chaffee, Illmo, Fornfelt, Oran, Morley, Dexter, East Prairie, Morehouse, Dudley, Fisk, Bertrand and Blodgett, as well as of the Company's Transmission lines. This report was introduced in evidence and testified to at hearings held at Cape Girardeau, Charleston and Sikeston, Missouri.

Bunceton Ice, Light and Fuel Company, Bunceton, Missouri.

In order to determine the Operating results of this Company under a temporary rate increase, we audited its Operating Revenues, Operating Expenses and Operating Loss for the three months ended December 31, 1920.

St. Joseph Railway, Light, Heat and Power Co., St. Joseph, Missouri.

A supplementary audit of this Company's records was made to determine the additions and betterments to its plant from July 1, 1918, to December 31, 1920; also to ascertain the Operating Revenues, Operating Expenses and Net Profit or Loss from Operations for the year ended November 30, 1920, of the Electric, the Railway and the Heating Departments.

This audit entailed many technical apportionments between the three classes of service rendered. A consolidated Profit and Loss Account, as well as a Profit and Loss exhibit of each class of Operations was prepared. This Report was testified to at a hearing held in Jefferson City.

Macon Telephone Company, Macon, Missouri.

The Operating Revenues and Expenses of this Company for the year 1920 were audited and information relative to Securities, Plant Value, Dividend, etc., requested by certain patrons was secured and incorporated in or report. A Surplus Account, showing the Income and Outgo since 1909, was prepared and included.

California Light Plant, California, Missouri.

Due to an application for an increase in rates, an audit was made of the above Company's books and records and the Operating Revenues, Operating Expenses and various statistical data for the year 1920 and the first four months of 1921 were ascertained. This plant operates in California, Clarksburg and Tipton, which necessitated apportionment of the Operating Expenses between the three localities.

Kinloch Long Distance Telephone Company, St. Louis, Missouri.

An audit of the books and records of the above Company was consummated, in order to ascertain the Original Cost of the Exchanges at St. Charles and Valley Park, Missouri. Also to determine the Operating results of said exchanges for the calendar year 1920. A Profit and Loss Account, as well as a detailed statement of the Operating Expenses was prepared and shown for each exchange. Various apportionments were necessitated in this audit.

Suburban Telephone Company.

An audit of the books and records of above Company was made in order to determine the Original Cost

and results of Operations of the following exchanges operated by the Company:

Clayton, Ferguson, Maplewood, Webster Groves and Kirkwood. Various schedules relative to Property, Securities, Profit and Loss, Operating Expenses and Surplus were prepared and incorporated in the report. This audit required many apportionments.

Sedalia Home Telephone Company.

An audit of above Company was ordered to ascertain the Original Cost of Property, as of December 31, 1920, as well as the results of Operations for the calendar year of 1920. Various exhibits reflecting the plant cost, to December 31, 1920, the Profit and Loss, the Operating Revenues, Operating Expenses and Results of Operations for the year 1920 and an analysis of Surplus Account from 1910 to 1920, were prepared and incorporated in the report.

Kinloch Telephone Company, St. Louis, Missouri.

An audit to determine the Original Cost of plant to December 31, 1920; the Operating Revenues, Operating Expenses, and Net Profit on Operations for the fiscal year of 1920, was made, pursuant to the Commission's order. Statements showing the Fixed Capital installed from 1899 to 1920, inclusive, as well as the Profit and Loss Account, and the detailed Operating Expenses for the year 1920, for the St. Louis and East St. Louis Exchanges, and an analysis of Surplus Account from 1899 to 1920 were prepared and made a part of the report. This was a large audit and required considerable time to complete.

Harvey Light, Power and Ice Company, Eldon, Missouri.

An audit to determine the Operating results for the six months ended June 30, 1921, together with such information as was available from the records relative to plant cost was made during this period. Statements of Plant Cost, Operating Revenues and Expenses, and Consumer's data were incorporated in the report.

Southwestern Bell Telephone Company, Marshall, Mo., Exchange.

An audit to determine the net additions to property since our last audit (i. e. January 1, 1917) and the Operating results for the calendar year of 1920 and the first six months of 1921 was made of the above Company. Various exhibits were prepared and included in our report. This audit necessitated an apportionment of Toll and Exchange Revenues and Expenses. The report was presented in evidence and testified to at a hearing before the Commission.

Kirkville Gas, Heat and Electric Company, Kirkville, Missouri.

An audit of this Company in order to ascertain the Operating results for the fiscal year ended August 31, 1921, was made during this year. Statements showing Operating Revenues, Operating Expenses, Production Statistics and Unit Costs of Fuel and Gas Oil were prepared and made a part of the report.

Tarkio Electric and Water Company, Tarkio, Missouri:

An audit to determine the Operating results during the period of 10 months ended July 31, 1921, together with such information relative to the Plant Cost as could be obtained, was made of this Company. Schedules showing Original Cost and Operating Results, of the Electric, Water and Ice Companies were filed in the report. This audit entailed various apportionments between the different classes of properties operated.

Kansas City Telephone Company, Kansas City, Missouri.

An audit to determine the additions to property since the Consolidation, as of August 1, 1919, of the two Companies operating in Kansas City, as well as the Operating results for the nine months period ended September 30, 1921, was made. Various exhibits bearing on the cost of property, the Operating results, Stations in Service, Comparative Cost of Material, etc., were prepared and incorporated in the report. This audit necessitated a separation of Revenues and

Expenses between Toll and Exchange, and between Kansas City area and other areas. This report was introduced in evidence and testified to at a hearing held in Kansas City during the latter part of November.

Audits Made During the Period December 1, 1921, to Date:

Columbia Telephone Company, Columbia, Missouri.

The books of this Company were audited in order to determine the additions to property since January 1, 1914, the date of a previous audit, and also to ascertain the Operating Revenues and Operating Expenses for the 10 months ended October 31, 1921. Our report was presented in evidence and testified to by a member of this department. This audit was occasioned by an application for increased rates.

Kansas City Long Distance Telephone Co.—Richmond & Excelsior Springs Exchanges.

An audit was made of the Operating Revenues and Expenses of above exchanges for the nine months ended September 30, 1921. Various schedules of statistical data were also prepared. This audit entailed the segregation of expenses between Toll and Exchange.

Trenton Gas and Electric Company, Trenton, Missouri.

In order to determine the results of a temporary rate increase, granted this company, effective December 1, 1920, the Commission ordered an audit of the records of this utility. Operating Revenues and Expenses for the 12 months ended November 30, 1921, as well as the property accounts of the Company since its organization, were audited. A segregation of the expenses between Electric, Gas and Ice activities was required. Report was submitted in evidence and testified to by a member of this department.

Southwestern Bell Telephone Co.—Kirksville Exchange.

An audit to determine the operating results of the above exchange for the 12 months ended October 31, 1921, was ordered and consummated. The segregation

of Toll and Exchange Expenses was again encountered here. This segregation is an intricate and involved proceeding, necessitating the employment of many technical apportionments, allocations and assignments, over which have arisen many of the most mooted questions and controversies of our Public Utility accounting work.

Home Telephone Company—Centralia, Missouri.

An audit of the records of above company was made for the 10 months period ended October 31, 1921. A statement of the Revenues and Expenses, segregated to Toll and Exchange was prepared, as well as other statistical data. This report was submitted in evidence and testimony substantiating same given at a hearing in Jefferson City.

Webb City & Carterville Gas Company.

An audit to determine the Original Cost of above property to December 31, 1921, as well as the Operating Revenues and Expenses for the calendar year of 1921, was completed. The audit entailed the apportionment of overhead and commission charges of a holding company operating many properties in the Southwest. Report was presented in evidence and testimony given at hearing of case.

Carthage Gas Company.

The Original Cost to December 31, 1921, and Operating Revenues and Expenses for calendar year of 1921 were ascertained by an audit, and various schedules prepared and made a part of our report. This property is a component part of the holdings of a Controlling Company operating broadly in the Southwest and common and overhead expenses were required to be pro-rated and assigned to this unit. Report was testified to at a hearing held in Jefferson City.

St. Charles Lighting Company—St. Charles, Mo., Gas Plant.

An audit to determine the operating results for the year of 1921 and of the property accounts to De-

ember 31, 1921, was completed in February, 1922. Various schedules of statistical data were also prepared and included in report.

Warrensburg Electric Light, Heat and Power Company.

Knobnoster Electric Company.

Concordia Light and Power Company.

Lamonte Light and Power Company.

An audit to ascertain the Original Cost of above properties to December 31, 1921, and the results of their operation for the calendar year of 1921 was made by this department. These properties are jointly owned and operated. A transmission line from the generating station at Warrensburg supplies current to the other three towns. In order to determine the cost of operating each property it became necessary to make many apportionments of joint expenses.

Kansas City Gas Company—Kansas City, Missouri.

An audit was made of the books of the above named company to ascertain the operating results for the calendar year of 1921. Statements were prepared of the Profit and Loss Account, the Classified Expenses, Profit on Merchandise Sold, and various statistical data. Maintenance Costs were investigated for the past seven years.

West St. Louis Water and Light Company—St. Louis County Water System.

An audit to determine the additions to property from date of previous audit, viz. July 1, 1915, to December 31, 1921, as well as the Operating Revenues and Operating Expenses for the year 1921, was completed in February, 1922. In addition to Schedules of Plant Account and Operating Revenues and Expenses many schedules showing statistical data were prepared and incorporated in one report.

Missouri Public Utilities Company—Water Works, Webb City and Carterville.

We audited the Operating Revenues and Expenses of above company for the year 1921 and also

the plant additions from March 1, 1913, to December 31, 1921.

Rockport Light and Power Company.

We audited this company's books to determine the Original Cost of company's property to December 31, 1921, and its Operating results for year 1921. Report was prepared, submitted in evidence, and testimony given relative thereto at hearing of company's case at Jefferson City.

Laclede Gas Light Company—Electric Department—St. Louis.

In order to determine the operating results for the year 1921 we audited the electric department operation of the above company. As this company operates a gas as well as an electric utility many apportionments of Common Expenses were necessary. This report included many schedules of statistical data in addition to the regular schedules.

Brookfield Electric Light Company.

Laclede Electric Light Company.

Rothville Electric Light Company.

Browning & Purdin Electric Company.

Sumner Electric Company.

City of Linneus—Municipal Light Plant.

The above properties are supplied with current from a generating station located at Brookfield, Missouri. We audited the Plant Records to December 31, 1921, as well as the Operating Revenues and Expenses for the year 1921. Various apportionments were required in order to determine the cost of service to each community. Much statistical data was compiled and reported. This report was presented in evidence and testimony relative thereto given by a member of this department.

City Light and Traction Company—Sedalia, Missouri.

An audit to determine the Original Cost of the Electric Light Department, the Gas Department,

and the Street Railway Department to December 31, 1921, as well as their operating results for the year 1921, was made. The company also operates an Ice Plant, and the segregation of expenses between the four departments required many apportionments and allocations. In addition to the regular statements of Property and Operating Accounts, various schedules of statistical data pertinent to the various activities of the company were prepared and incorporated in the report.

Water, Light and Transit Company—Brunswick, Missouri.

In conjunction with the Commission's Engineering Department an investigation of the records of the Water, Light and Transit Company was undertaken in order to determine the investment cost of Physical Property apportionable to Brunswick's electric and water service. Also a study of the cost of producing electric energy at Carrollton and the operating results at Brunswick for the year 1921.

St. Joseph Water Company—St. Joseph, Missouri.

We audited the records of this company in order to determine the Original Cost of the property to December 31, 1921, and the results of operation for the year 1921. Various schedules of statistical data were prepared and included along with the regular customary statements in the report.

Joplin Gas Company—Joplin, Missouri.

An audit was made of this Company's records to determine its Original Cost to June 30, 1922, and also the operating results for the year 1921 and the first six months of 1922. In addition to the customary statements of Plant and Operation, we compiled and incorporated many schedules of necessary statistics.

Springfield Gas and Electric Company—Springfield, Missouri.

Laclede Gas Light Company—St. Louis.

The Accounting Staff is now engaged in an audit of the records of the above two companies.

Compiling Comparative Statistical Data:

During the fiscal year this Department compiled much statistical data, gathered from the Annual Reports filed by Utilities, and furnished same to Cities, States, Commissions, Brokers, Civic Bodies, etc., at rates stipulated by the Public Service Commission Law.

Annual Reports:

It was noted during the year that many Utilities were growing lax in the filing of their Annual Reports. Their delinquency evidently grew out of the extensions granted during the war period, owing to shortage of office help and loss of experienced clerks. On July 20, 1921, a circular letter, calling attention to the overdue reports, and citing the penalty provided by law for default in filing such reports, was mailed to each delinquent Utility and the flood of responses, explanatory and otherwise, ensuing entailed an enormous amount of correspondence, but resulted in practically completing all our files.

Stock, Bond and Note Authorizations:

Utilities organized, existing or incorporated under the laws of Missouri may issue Stocks, Bonds, Notes and other evidences of indebtedness payable at periods of more than twelve months after the date thereof, only after securing an order from the Commission authorizing such issue. The order specifies the amount of issue and the disposition of the proceeds. This Department examines all exhibits and documents presented and reports its recommendations to the Commission. The total authorizations requested for the period December 1, 1921, to September 30, 1922, shows an enormous increase over the preceding period. For the last fiscal year, viz: December 1, 1920, to November 30, 1921, the Commission authorized the issuance of Stocks, Bonds and Notes in the amount of \$25,-602,512.00. During the period ended September 30, 1922, the gross amount of Par Value Bonds, Stocks and Notes aggregates the sum of \$304,609,903.88 and in addition thereto "No Par Value" Stock in the

amount of 1,350,050 shares were authorized. The issuance of No Par Value Stock is new in the State of Missouri. Some of our largest utilities have re-organized and others are in process of reorganization upon this new basis. The investigation required in passing upon No Par Value Stock issues is more involved and requires more detailed analysis than was necessitated by the old Par Value issues. During the last period under review the Department was called upon to analyze and report upon the proposed recast of the financial structure of many companies, principal among them being the

Missouri-Kansas-Texas Railroad Company, Kansas City Power and Light Company, Union Electric Light and Power Company of St. Louis.

The securities issued by the two first named are shown in the following "Table of Authorizations Granted", 1922 period, but the Union Electric Light and Power Company did not make application for issuance of Securities with its application for authority to re-finance its properties. These Securities will appear in next year's table. The investigation and analysis required in these financial re-organizations is involved, detailed and carries great responsibility.

The Commission requires semi-annual reports from utilities of the sale of securities and disposition of proceeds. These reports are checked in this Department to ascertain whether all stipulations set forth in the order are met.

The following tables show the applications for security issues granted during the periods under review.

TABLE SHOWING ALL AUTHORIZATIONS GRANTED TO ISSUE STOCKS, BONDS, NOTES AND OTHER EVIDENCES OF INDEBTEDNESS UNDER THE PUBLIC SERVICE COMMISSION LAW, FROM DECEMBER 1, 1920, TO NOVEMBER 30, 1921.

No.	Name of Company.	Kind of Security.	Amount Allowed.	Date of Permit.

GAS, ELECTRIC, HEAT AND WATER DEPARTMENT.

The work of this department is at present carried on by its Chief, one Assistant Engineer and one Stenographer.

The entire duties of this department are as follows:

First: The keeping of an accurate official record of all corporations and municipalities furnishing gas, electric, heating or water service in this State which come under the jurisdiction of the Commission in accordance with the definitions provided by the Public Service Commission Law.

Second: Attention to all correspondence and verbal requests for information coming before the Commission on matters pertaining to the business of furnishing gas, electric, heating or water service and allied technical subjects in general.

Third: Adjustment of all correspondence complaints involving gas, electric, heating or water service.

Fourth: The filing of the schedule of rates of gas, electric, heating and water utilities.

Fifth: General inspection and test of service meters.

Sixth: General supervision of matters pertaining to quality of service and equipment by gas, electric, heating and water utilities in so far as the public interest, public health and protection of the public and employees are concerned.

Seventh: Analysis in conjunction with the Accounting Department of all operating reports as required by this Commission's orders allowing temporary rates, from which analyses appropriate orders are made up, relative to continuing or changing temporary rates as allowed by this Commission.

Eighth: Miscellaneous technical work in connection with formal complaints and investigations before the Commission involving gas, electric, heating and water utilities.

The members of this department attended hearings and assisted the Commission in preparing reports and orders in the following cases during the period of this report:

1517, 1546, 1673, 1759, 1762, 1772, 2048, 2113, 2250, 2311, 2307, 2427, 2466, 2499, 2527, 2538, 2540, 2550, 2620, 2622, 2623, 2651, 2652, 2670, 2671, 2678, 2690, 2699, 2704, 2724, 2745, 2756, 2768, 2773, 2779, 2791, 2804, 2805, 2810, 2822, 2825, 2827, 2832, 2849, 2855, 2882, 2898, 2899, 2924, 2931, 2934, 2949, 2951, 2975, 2979, 3001, 3009, 3044, 3057, 3060, 3062, 3063, 3073, 3074, 3093, 3096, 3097, 3101, 3102, 3103, 3105, 3106, 3107, 3108, 3125, 3146, 3150, 3172, 3175, 3177, 3178, 3181, 3182, 3183, 3184, 3199, 3203, 3210, 3211, 3212, 3217, 3231, 3246, 3248, 3249, 3278, 3308, 3323, 3329, 3334, 3336, 3337, 3339, 3344, 3346, 3349, 3354, 3355, 3356, 3379, 3380, 3381, 3399, 3400, 3401, 3404, 3405, 3406, 3419, 3423, 3427, 3434.

The following investigations and inspections were made by members of this department:

- Bunceton:** In Case No. 3248—Inspection of light and ice plant in regard to application of owners to discontinue electric service at Bunceton.
- Clinton:** Clinton and Eldorado Springs in Case No. 3404—Physical inspection of proposed transmission line of the West Missouri Power Company from Clinton to Deepwater and Lowry City and from Deepwater to Eldorado Springs.
- Ash Grove:** Investigation of Electric Service.
- Ava:** Relative, change in electric rates.
- Boonville:** Investigation of water supply Missouri State Reformatory.
- Brunswick:** Investigation of electric service.
- Dexter:** Investigation of electric service.
- Edgerton:** Inspection of Edgerton Light and Power Co., rural service.
- Fulton:** Consultation relative to electric plant improvements.
- Greenfield:** Inspection of electrical plant.
- Humansville:** Investigation of electric plant and service.
- Hume:** Inspection of Hume electric light distribution system and electric service.
- Huntsville:** In Case No. 2250—Inspection of Clifton Hill Light and Power Company's transmission lines and investigation of inductive interference troubles between said lines and the Huntsville Telephone Company's lines.
- Louisiana:** Case No. 2931—Inspection of inductive interference caused by Louisiana Light and Power Company's transmission line between Louisiana, Missouri, and Frankfort, Missouri.
- Maitland:** Investigation of electrical service.
- Mexico:** Mexico, Missouri—Case No. 3246—Inspection and tests of the steam heating service and meters of the Missouri Utilities Company.
- Moberly:** (1) Investigation of electrical service.
- Moberly:** (2) Relative to gas rates.
- Montgomery:** Relative adjudication of Case No. 2623.
- Montgomery:** Investigation of electric service.
- Mound City:** Inspection of Mound City water supply.
- Mt. Vernon:** To advise in reconstruction of electric system.
- Mountain Grove:** To make test of power plant.
- New Cambria:** Case No. 3269 and Case No. 3349—Inspection of electric light distribution system in the city of New Cambria, Missouri.

Princeton: Investigation of electrical rates.

Richland: Inspection of electric light plant distribution system and electric service at Richland, Missouri.

Springfield: Investigation Mountain Grove electric service.

St. Charles: Investigation of gas plant service and operation.

St. Louis County: In Case No. 3380—Inspection and survey of the West St. Louis Water and Light Company's distribution system—inadequate service.

Trenton: Investigation of gas service.

Carrollton: Brunswick: Dalton: Keytesville: Inspection and recommendation relative to inductive interference to telephone systems caused by high tension transmission lines.

In the following table will be found a summary of the Gas, Electric, Heating and Water Utilities in this State.

SUMMARY OF UTILITIES LISTED IN TABLES I TO VI FOLLOWING

Class of Plant.	NUMBER OF PLANTS RENDERING SERVICE.			NUMBER OF EACH CLASS OF SERVICE RENDERED.																
	Privately Owned.	Municipal.	Total Number.	ELECTRIC				GAS.	HEAT.	WATER										
				By trans- mission lines.		By local plants.		Privately Owned.	Privately owned.	Privately Owned.	Municipal.									
				Privately Owned.	Municipal.	Privately Owned.	Municipal.

TELEPHONE AND TELEGRAPH DEPARTMENT.

The entire duties of this department are as follows:

First: The keeping of an accurate official record of all corporations furnishing telephone or telegraph service, or both, in this state which come under the jurisdiction of this Commission in accordance with the definitions provided by the Public Service Commission law.

Second: Attention to all correspondence and verbal requests for information coming before the Commission on matters pertaining to the furnishing of telephone and telegraph service and allied technical subjects in general.

Third: Adjustment of all correspondence complaints involving telephone or telegraph service.

Fourth: The filing of the schedule rates of all telephone and telegraph companies.

Fifth: General inspection and test of telephone and telegraph service.

Sixth: General supervision of matters pertaining to quality and adequacy of telephone and telegraph service.

Seventh: General supervision of construction and operation of equipment by telephone and telegraph companies in so far as the public interest, public health and protection of public and employees are concerned.

Eighth: Miscellaneous technical work and giving of testimony and in making reports in connection with formal complaints, hearing, and investigations before the Commission involving telephone and telegraph companies.

The members of this department attended hearings and assisted the Commission in preparing reports and orders in the following cases during the period of this report:

1839, 1888, 1910, 1911, 2054, 2250, 2347, 2352, 2389, 2512, 2650, 2663, 2697, 2700, 2701, 2702, 2703, 2762, 2790, 2795, 2808, 2850, 2863, 2873, 2897, 2903, 2911, 2926, 2931, 2956, 2970, 3000, 3005, 3009, 3018, 3019, 3020, 3021, 3024, 3028, 3043, 3045, 3069, 3082, 3088, 3095, 3111, 3112, 3114, 3121, 3124, 3125, 3126, 3134, 3137, 3147, 3148, 3152, 3163, 3165, 3169, 3187, 3188, 3192, 3193, 3213, 3218, 3219, 3228, 3232, 3234, 3250, 3263, 3269, 3270, 3275, 3300, 3302, 3303, 3304, 3311, 3328, 3349, 3352, 3384, 3385, 3408.

The following inspections were made by members of this department:

- Memphis, Mo.*—Inspected telephone exchange at Memphis, Missouri, including farmer lines, and wrote report on conditions.
- Dawn, Mo.*—Inspected telephone exchange at Dawn, Missouri, and wrote report on conditions, including recommendations for certain changes.
- Leadwood, Mo.*—Inspected telephone exchange at Leadwood, Missouri. Gave advice to owners as to the removal of trouble, also wrote report on conditions of the exchange.
- Pineville, Mo.*—*Anderson, Mo.*—Made inspection and report on telephone plants at Pineville and Anderson, Missouri.
- Wright City, Mo.*—Made inspection of telephone property and tests of service at Wright City, Missouri.
- Troy, Mo.*—Made inspection of telephone property and tests of service at Troy, Missouri.
- Frankford, Mo.*—Made inspection of telephone property and test of service at Frankford, Missouri.
- New London, Mo.*—Made inspection of telephone property and tests of service at New London, Missouri.
- Washington, Mo.*—Made inspection of telephone property and tests of service at Washington, Missouri.
- Richmond, Mo.*—Made inspection and wrote report on telephone exchange at Richmond, Missouri.
- Huntsville, Mo.*—Made inspection of telephone property of Huntsville Telephone Company.
- St. Louis, Mo.*—Investigated charges made by hotels from pay-stations and made report on same.
- Richland, Mo.*—Made inspection and report on Richland telephone plant and service.
- Columbia, Mo.*—Made investigation of telephone service at Columbia, Missouri.
- Clifton Hill, Mo.*—Made inspection of telephone property for Clifton Hill Telephone Company.
- Weston, Mo.*—Made inspection of service and property and wrote report on Weston Telephone Company, Weston, Missouri.
- Kansas City, Mo.*—Attended conference with representatives of United States Bureau of Standards relative to quality of telephone service.

Kansas City, Mo.—Attended cut-over of manual to machine switching of Kansas City Telephone Company's main exchange.

King City, Mo.—Made inspection of property and service of King City Telephone Company.

Humansville, Mo.—Investigation of Inter-County Telephone property and service at Humansville, Missouri.

Newtown, Mo.—Made inspection of Newtown and Harris Telephone exchanges; also investigated service on rural lines and made report and recommendations relative to same.

REPORTS OF THE COMMISSION.

The Commission has, to date, issued eleven bound volumes of its regular Reports (Mo. P. S. C.), and four Advance Sheets of Volume XII.

It is the practice of the Commission to include in these Reports the formal cases only. A great number of cases decided by the Commission are docketed "informal cases", in which only an order is issued. These cases are not included in the above series of Reports. Many other matters are treated through correspondence, general orders, conference rulings and by the several Departments in the regular course of business.

The value of these Reports, not only to operators and managers of public utilities in this State, but also to others either directly or indirectly interested in the efficient management of public utilities, has been acknowledged and appreciated, as evidenced by the subscription list, on which are found attorneys, engineers, accountants, financial institutions, chambers of commerce, general and law libraries, and some of our greatest universities and educational institutions.

Each decision in the Reports is titled, head-noted, credited as to authorship, and bears the docket number and the formal appearances entered. Each volume is indexed, showing cases reported, cases cited, localities affected and the subject-matter treated therein. A list of court cases wherein the Commission was a proper party is also given. Advance Sheets are issued that those interested may not be inconvenienced pending publication of the bound volume.

A charge of \$2.50 per volume, including Advance Sheets as issued, all prepaid—being a nominal charge based on cost of publication—is made for these Reports. Separate Advance Sheets are sold for 35 cents each.

A Digest of the first eleven volumes of the Reports is now in the process of compilation, and will be off the press about January, 1923. This Digest (one volume) is divided into two

parts: (1) a digest of cases reported: (2) the Missouri Public Service Commission Law. Both the digest of decisions and the Law are annotated.

FEES COLLECTED.

In accordance with the provisions of Section 21 of the Public Service Commission Law, this Commission has collected and paid into the State Treasury during the year December 1, 1920 to and including November 30, 1921, the sum of \$23,954.18; and for the ten months, December 1, 1921, to and including September 30, 1922, the sum of \$18,092.67.

JOHN A. KURTZ, Chairman;
EDWIN J. BEAN,
NOAH W. SIMPSON,
HUGH McINDOE,
A. J. O'REILLY, Commissioners.

APPENDIX A.

Formal Complaints Against Common Carriers.

APPENDIX "A."
Formal Complaints Against Common Carriers.

No. and date. 1920-1921.	Name.	Subject.	Disposition.
2814 Dec. 3.	City of St. Joseph vs. St. Joseph Railway, Light, Heat & Power Company.	Discontinuance of street railway service after midnight.	Pending.

3416 Sept. 11.	Seth Turpen, L. A. Moadows, R. C. Pixler, vs. Clarence Stephenson and Geo. Bird, vs. Matland Electric Light & Power Co.	For extension of electric service to Elliott Heights Addition.	Pending.
3424 Sept. 19.	City of Sedalia, vs. City Water Company of Sedalia.	To compel laying of cast iron water pipes on E. 13th St., to fix size thereof and manner of installation.	Pending.

APPENDIX C.

Applications for Certificates of Convenience and Necessity.

APPENDIX "C."

Applications for Certificate of Convenience and Necessity.

No. and date. 1920-1921.	Name.	Subject.	Disposition.
2827 Dec. 11.	In the matter of the application of the Liberal Light Company for certificate of convenience and necessity to build and operate a transmission line from Liberal, Mo., to Missouri-Kansas State Line near Mulberry, Kansas.	For certificate of C. & N. for transmission line, Liberal, Mo., to Mo.-Kansas State Line.	2-8-21. Application granted and order issued.
2904 Feb. 24.	In the matter of the application of the St. Eunice Electric Light Co., a corporation, for a certificate of convenience and necessity authorizing the construction and operation of an electrical transmission line to connect with the lines of the Fulton Municipal Electric Light Plant.	For certificate of C. & N. for transmission line between Fulton and nearby territory.	3-31-21. Application granted and order issued.
2916 Mar. 8.	In the matter of the application of the Missouri-Illinois Railroad Company for certificate of C. & N. to acquire, own, hold and operate the railroad properties and assets of the former Illinois Southern Railway and to issue securities.	For certificate of C. & N. to acquire, maintain and operate a railroad and to issue securities.	3-14-21. Application granted and order issued.
2931 Mar. 30.	In the matter of the application of the Louisiana Light, Power & Traction Company for certificate of convenience and necessity for the construction and operation of a transmission line between Frankford and Louisiana, Mo.	For certificate of C. & N. to construct and operate electric transmission line between Frankford and Louisiana, Mo.	5-18-21. Report adopted and order issued granting application under conditions named therein.
3004 June 9.	In the matter of the application of the Green Light & Power Company for certificate of convenience and necessity to construct a transmission line from a point near Buckner to Levasy, Mo.	For transmission line from Buckner to Levasy.	6-21-21. Application granted and order issued.
3009 June 14.	In the matter of the application of the Missouri Gas & Electric Service Company for a certificate of convenience and necessity to construct transmission line from Liberty, Mo., to Lexington, Mo.	For transmission line from Liberty to Lexington, Mo.	7-22-21. Application granted and order issued.

No. and date. 1921.	Name.	Subject.	Disposition.
3044 July 14.	In the matter of the application of the Indian River Power Company, a corporation, for certificate of convenience and necessity to operate a transmission line from its power house near Lanagan, Mo., to Anderson, Mo., via Lanagan, and from said power house to Pineville, Mo.	For transmission line from Lanagan to Anderson, and from Lanagan to Pineville.	9-14-21. Application granted and order issued.
3100 Aug. 31.	In the matter of the application of the Edina Light Co., and the town of Brashear for approval of contract between said parties for construction and operation of an electric transmission line from Hurdland to Brashear; for approval of franchise granted by town of Brashear to Edina Light Co., fixing and establishing rates for service in said town, and for certificate of C. & N. covering these matters.	For certificate of C. & N. for transmission line, Hurdland to Brashear, fixing rates, etc.	11-3-21. Application granted and order issued.
3101 Aug. 31.	In the matter of the application of the Green Light & Power Co., Windsor Light & Power Company, Mr. Henry Busse of Urich, Mo., and the cities and towns of Chilhowee, Creighton, Windsor, Urich, Calhoun, Blairstown and Leeton for order approving sale of electric properties and granting certificate of C. & N. for transmission line from Pleasant Hill to Windsor.	For sale of electric properties and for transmission line from Pleasant Hill to Windsor.	11-9-21. Application granted and order issued.
3102 Aug. 31.	In the matter of the application of Percy W. Markham to operate and maintain an electric transmission line from city of Brookfield to town of Rothville, and to operate a distributing plant within the town of Rothville, Mo.	For transmission line, Brookfield to Rothville, etc.	Pending.
3106 Sept. 1.	In the matter of the application of the West St. Louis Pipe Line Company for certificate of public convenience and necessity authorizing the construction by it of a line of 24-inch cast iron water mains in St. Louis county, Mo., along and on the Hog Hollow Road and the Olive Street Road for a distance of about 8 miles.	For case iron water mains in S. Louis County, Mo.	9-30-21. Application granted and order issued.

No. and date. 1921.	Name.	Subject.	Disposition.
3108 Sept. 2.	In the matter of the application of the Excelsior Springs Water, Gas & Electric Company for order authorizing it to construct a 13,200-volt, 3-phase, 60-cycle transmission line from Excelsior Springs to Rayville, Mo.; to exercise its franchise with town of Rayville, including its street lighting contract; and to issue \$8,000 8% coupon notes payable 10% thereof in one year, and 10% thereof each year there-after.	For transmission line, Excelsior Springs, to Rayville, etc.	10-27-21. Application granted and order issued.
3129 Sept. 24.	In the matter of the application of the Platte Valley Light & Power Company for certificate of C. & N. to construct, maintain and operate transmission lines between Platte City, Smithville and Nashua, Missouri.	For certificate of C. & N. to operate transmission line.	10-3-21. Application granted and order issued.
3130 Sept. 26.	In the matter of the application of the Edina Light Co. and town of Gibbs, Mo., for approval of contract between said company and said town of Gibbs for construction of electric transmission line to and in said town, providing for granting of franchise by said town to said company, fixing and establishing rates for electric service, and for issue of certificate of C. & N. therefor.	For transmission line, from Brashear to Gibbs, fixing rates for electric service and for certificate of C. & N.	11-3-21. Application granted and order issued.
3131 Sept. 27.	In the matter of the application of the Missouri Gas & Electric Service Company for certificate of convenience and necessity for the construction and operation of an electrical distribution system in Missouri City, Mo.	For certificate of C. & N. for construction and operation of distribution system at Missouri City, Mo.	10-27-21. Application granted and order issued.
3142 Oct. 7.	In the matter of the application of the Edina Light Co., and the City of LaBelle, Mo., for approval of contract between said Light Co., and said city for construction of an electric transmission line to and in said city, fixing rates for electric power and service to said city and its inhabitants, and for certificate of C. & N. therefor.	For transmission line, Knox City to LaBelle, fixing rates for electric service and for certificate of C. & N.	11-3-21. Application granted and order issued.

No. and date.	Name.	Subject.	Disposition.
3146 Oct. 10.	In the matter of the application of the K. C. Power & Light Co. for (a) certificate of convenience and necessity, authorizing it to conduct the business of public utility in the City of Parkville, Mo., and (b) an order authorizing it to construct, maintain and operate an electric transmission line from North Kansas City to Parkville.	For certificate of C. & N. to transact electric business in Parkville, and for transmission line from North Kansas City to Parkville.	11-9-21. Application granted and order issued.
3154 Oct. 15.	In the matter of the application of the Bucklin Light & Power Company, a corporation of Bucklin, Mo., for certificate of convenience and necessity, and permit to construct an electric transmission line from New Cambria, Mo., to Ethel, Mo.	For transmission line, New Cambria to Ethel.	Pending.
3161 Oct. 22.	In the matter of the application of the Kansas City Power & Light Co., for certificate of public convenience and necessity for the construction of a transmission line approximately 2 miles in length extending from 37th Street and Eastern Avenue to 37th St. and Blue Ridge Blvd., in Kansas City, Mo.	For transmission line, on 37th St., between Eastern Ave., and Blue Ridge Blvd., Kansas City, Mo.	10-22-21. Application granted and order issued.
3167 Nov. 2.	In the matter of the application of George E. Silver for a preliminary order for a certificate of convenience and necessity to establish and operate an electric plant at Montgomery City, Missouri.	For electric plant at Montgomery City, Mo.	Pending.
3172 Nov. 21.	In the matter of the application of the Missouri Utilities Co. of Mexico, Mo., for a certificate of convenience and necessity to (a) construct, maintain and operate a 3-phase, 60 cycle, 16,500 volt transmission line on the present terminus of its line at Wellsville, Mo., to its proposed substation at Montgomery City, Mo.; (b) to construct, maintain and operate a substation at Montgomery City, Mo., for the purpose of supplying the Montgomery Power Co. with electricity, which they in turn will distribute to the inhabitants of said Montgomery City for light, heat and power, and for lighting the streets of said city.	For transmission line from Wellsville to Montgomery City, and for electric service thereat.	Pending.

No. and date. 1921-1922.	Name.	Subject.	Disposition.
3177 Nov. 23.	In the matter of the application of the Twin City Light & Power Company for certificate of convenience and necessity for constructing, maintaining and operating a light plant in the incorporated villages of Marble Hill and Lutesville and the adjacent territory within 1.2 mile of the corporate limits thereof.	For certificate of convenience and necessity to construct, operate light plant in Marble Hill and Lutesville, etc.	Pending.
3181 Nov. 29.	In the matter of the application of the Montgomery Power Co. for certificate of convenience and necessity to construct distribution line from proposed sub-station of Missouri Utilities Co. at Montgomery City, Mo. for supplying electric energy to said town and its inhabitants, etc.	For transmission lines in and about Montgomery City, Mo.	Pending.
3185 Dec. 1.	In the matter of the application of the Kansas City Power & Light Company for certificate of convenience and necessity for construction of a 13,000-volt, 3-phase power transmission line from a point near the S. W. corner of city limits of Independence to the Spencer Rock Crusher on Spring Branch Road.	For transmission line in Jackson County.	12-1-21. Application granted and order issued.
3186 Dec. 1.	In the matter of the application of the Ewing Light & Power Co. (a corporation) for certificate of convenience and necessity for operation of an electric light plant and distribution system in said City of Ewing.	For electric light and power plant in Ewing, Mo.	12-1-21. Application granted and order issued.
3187 Dec. 5.	In the matter of the application of John A. Eby to sell and of Dan J. Eby to buy the Missouri City Telephone Exchange at Missouri City, Mo.	For transfer of Missouri City telephone exchange.	12-5-21. Application granted and order issued.
