The Raytown Water Company Water Rate Case

(Case No. WR-2023-0344)

Introduction: The Missouri Public Service Commission.

The Missouri Public Service Commission regulates investor-owned electric, natural gas, steam, water and sewer companies and has limited authority over telephone providers in the state. The Commission ensures the public has access to safe, reliable and reasonably priced utility service. The Commission must balance the interests of the public – ratepayers – as well as company shareholders. In proceedings before the Commission, rates are set to give the utility company an opportunity – but not a guarantee – to earn a reasonable return on its investment after recovering its prudently incurred expenses.

In addition, the Commission regulates the state’s rural electric cooperatives and municipally-owned natural gas utilities for operational safety. The Commission also oversees service territory issues involving investor-owned electric utilities, rural electric cooperatives and municipally-owned electric utilities as well as those involving privately-owned water utilities, public water supply districts and municipally-owned water districts. Utility services and infrastructure are essential to the economy of Missouri. Virtually every Missouri citizen receives some form of utility service (electric, natural gas, telecommunications, water or sewer) from a company regulated by the Missouri Public Service Commission.
