Lines 3 and 4 require input from last year's annual report page 9.

Line 4 is the recording of new contributions for this year.

Line 11 depends on the method your company uses for CIAC amortization. If your company uses the "distributed" method as described below, no retirement entries for CIAC should appear in line 11, (leave them blank).

For retirement purposes, Contributions in Aid of Construction (CIAC) are amortized at the same rate as the depreciation rates set for the plant equipment. There are two methods as follows:

1. Attached Method: This method is the keeping of continuous property records such that the contributions are kept "attached" to the original equipment contributed. CIAC is amortized and retired at the same depreciation rate and retirement dates as the equipment which it is "attached" to. For this method complete the table with Line 25 through Line 27.

2. Distributed Method: Most small companies use this method. This method results in no CIAC retirement entries on line 11. The "distributed" method is to treat each contribution as a dollar amount that is equally distributed to all plant in service. Under this method, the annual CIAC amortization is a portion of the total plant depreciation expense. The ratio used to calculate this portion is the end of year CIAC balance divided by the end of year total plant in service. The CIAC amortization is simply the total plant depreciation expense multiplied by the ratio of CIAC to Total Plant. The annual amortization is added to the sum of all prior accumulated amortization until the total equals the original amount of all contributions. At this point the process is stopped and both the total CIAC and the accumulated amortization are reset to zero. For this method, complete the table containing Line 18 through Line 24.

INSTRUCTIONS for PAGE 10

On Page 10, provide all required information concerning interest expense, notes payable, bonds, bank loans and other financial debts that existed during the year. For each debt on which interest was paid during the year provide the name and address of the lender, the date of maturity, the loan balance, the interest rate on the loan, and the amount of interest paid. The amount of interest paid should be assigned to water utility expense and/or sewer utility expense based upon which utility was responsible for the loan.

INSTRUCTIONS for PAGE 11

On Page 11, provide descriptions, quantities and dollar costs of materials and supplies in inventory. These items may be pipe, wire, gasoline, diesel, etc. You should identify the cost and assign the cost to either water or sewer.

INSTRUCTIONS for PAGES W-1, W-2, W-3 and/or S-1, S-2, S-3

On Pages W-1, W-2, W-3 and/or S-1, S-2, S-3, provide information regarding all billed revenues, expenses, customer numbers and gallon sales.

INSTRUCTIONS for PAGE W-4

On Page W-4, provide information regarding quantities of water from each source of supply that entered the system. On Line 21, provide data regarding the maximum and minimum quantities of water supplied in any one day. On Line 22, provide the range of pressures that exist at the highest point of the system. On Lines 23 thru 26, provide information regarding any sale of water for resale.

INSTRUCTIONS for PAGES W-5, W-6 and/or S-4, S-5

On Pages W-5, W-6 and/or S-4, S-5, provide information regarding water and/or sewer utility plant-in-service, depreciation expense and depreciation reserve. The account numbers shown in column (b) are defined in the Uniform System Of Accounts (USOA). The definitions describe what type of plant equipment is included in each account number. For each company, a USOA CLASS, a set of account numbers, and a set of depreciation rates are assigned by the PSC. These assignments for use by your company should be specified in a Depreciation Rate Schedule included as part of your company's last certificate or rate case final order. If you do not have this schedule, call the PSC and ask to speak to someone in the Engineering and Management Services Department

Columns (c), (d), (e) and (f) require original installed cost of plant and equipment placed in service. If a replacement of plant occurs, such as a pump change-out or trading in a truck, then column (d) should show the full installed cost of the new item. In retirement column (e), record the original installed cost (from Plant Property Records), of the item which was replaced (removed). These entries should be supported by books and records, which identify the property and its location. The Balance at End of Year, column (f) equals columns (c) plus (d) minus (e).

Depreciation expense column (h) is computed using the Balance at End of Year column (f), --- or mid-year or mid-month convention used by your company. Record in column (g) the depreciation rate used, (from you company's PSC Depreciation Rate Schedule). Column (i) is the carry forward of depreciation reserve from last years annual report. Book Cost of Plant Retired column (j) should be the same as Retirements During the Year column (e). Column (k) should reflect cost incurred to remove the plant which was retired. Column (l) should reflect any money received from the sale or trade-in of the equipment removed or replaced. Reserve balance at End of Year column (n) equals (h) plus (i) minus (j) minus (k) plus (l) plus (m).
